QUESTION 1 OF 13

Chapter section: Concept 1, novice vs power user (the briefing has four parts: files, goal, limits, exact ask)

Hina is a restaurant manager who types into an AI tool: “write a weekly staff schedule.” What comes back is a generic template that ignores her two part-time cooks, the Friday fish delivery and the 10 p.m. closing. She has the staff availability sheet open on her desktop, and the schedule must be posted tonight. Which change to the prompt is most appropriate?

A. Add “think hard” so the AI spends more time on the schedule.

B. Attach the availability sheet and state the goal, the limits (two part-timers, Friday delivery, 10 p.m. close) and the exact ask.

C. Ask for ten different schedule styles and pick the nicest one.

D. Rewrite the same request in a more polite and formal tone.

Correct Answer: Option B

Explanation (Roman Urdu): Hina ka prompt sirf “exact ask” deta hai, baqi teen hisse (files, goal, limits) missing hain, isi liye jawab generic aaya. Chapter kehta hai ke ek naye colleague ko jo kuch chahiye wo do: availability sheet attach karo aur limits batao. A galat hai: thinking mode un cheezon ki kami poori nahi karta jo AI ko di hi nahi gayi. C galat hai: options se pehle context chahiye, warna das generic schedules milenge. D galat hai: tone badalne se missing information nahi aati.

Yaad rakhne wala rule: Jawab generic ho to AI ko mazeed soch nahi, mazeed context do.

Roman Urdu samajh (scenario aur question):

- Scenario: “Hina restaurant manager hai. Wo likhti hai ‘weekly staff schedule banao’. Jawab aam sa template aata hai jo uske do part-time cooks, Friday ki machli ki delivery aur raat 10 baje band hone ko nazar-andaaz karta hai. Availability sheet uske paas maujood hai. Schedule aaj raat lagana hai.”
- Question: “Prompt mein kaun si tabdeeli sab se munasib hai?”
- Key words: generic = aam/be-rang, template = saancha, availability = dastiyabi (kaun kab free hai), limits = hadood, attach = saath lagana.

Exam trap aur 3 clues:

1. Deciding detail: “generic template”, “ignores her two cooks”, aur sheet uske paas hai magar di nahi.
2. Question kya maang raha hai: prompt ki tabdeeli.

3. Trap: A (think hard) kyun ke ye taqatwar lagta hai, lekin masla soch ka nahi, missing context ka hai.
   QUESTION 2 OF 13
   Chapter section: Concept 2 and 3, pretrained knowledge, knowledge cutoff and the three retrieval modes
   Bashir is a hostel bookings associate. He asks AI, with no files attached: "What did the city council decide last month about tourist-accommodation tax?" AI answers in three confident paragraphs. The council meeting happened after the model's training ended, and Bashir plans to put the rate in tomorrow's guest notice. What is the most appropriate next step?
   A. Trust the answer, because it is detailed and confidently written.
   B. Ask AI to "think hard" and answer the same question again.
   C. Rephrase the question so it triggers a web search, and ask for a source link for each claim.
   D. Fix any spelling mistakes in the question and ask it again.
   Correct Answer: Option C
   Explanation (Roman Urdu): Council ka faisla model ke knowledge cutoff ke baad hua, isliye AI ke paas ye jaankari hai hi nahi aur wo andaza laga raha hai. Chapter ke mutabiq "latest", "last month", shehar ka naam jaise lafz web search trigger karte hain, aur source link maangne se tum check kar sakte ho. A galat hai: confidence sahi hone ka saboot nahi. B galat hai: sochne se wo cheez nahi milti jo training mein thi hi nahi. D galat hai: chapter kehta hai typos ka asar nahi hota.
   Yaad rakhne wala rule: Cutoff ke baad ki cheez ke liye web search maango aur source link maango.
   Roman Urdu samajh (scenario aur question):

- Scenario: "Bashir hostel mein bookings associate hai. Wo koi file lagaye baghair AI se puchta hai ke pichle mahine city council ne tourist-accommodation tax par kya faisla kiya. AI teen yaqeen bhare paragraph likhta hai. Meeting model ki training khatam hone ke baad hui thi, aur Bashir kal ke guest notice mein rate likhna chahta hai."
- Question: "Sab se munasib agla qadam kya hai?"
- Key words: knowledge cutoff = wo tareekh jahan training text khatam hoti hai, confident = yaqeen se bhara, tax rate = tax ki sharah, notice = ittela.
  Exam trap aur 3 clues:

1. Deciding detail: "after training ended", yaani model ko pata hi nahi.
2. Question kya maang raha hai: sahi agla kaam.

3. Trap: A kyun ke “confident” jawab sahi lagta hai, magar confidence sahi hone ka saboot nahi.

QUESTION 3 OF 13

Chapter section: Concept 4, context rot and starting a new chat

Imran is an operations associate at an ice rink. In one long chat he planned a staff rota, then debugged a ticket-sales spreadsheet, then asked AI to draft a thank-you note to a sponsor. The note now mentions the rota, the replies have become long and vague, and AI keeps apologising without progress. The sponsor note must go out in an hour. What is the most appropriate next step?

A. Send one more clarifying prompt explaining what the sponsor note should say.

B. Start a new chat, paste only the facts that matter, and continue there.

C. Ask AI to think harder about the same chat.

D. Delete the spreadsheet from the chat and carry on in the same conversation.

Correct Answer: Option B

Explanation (Roman Urdu): Ye context rot hai: ek hi chat mein kai alag topics, purane topics ab bhi jawab ko kheench rahe hain. Chapter kehta hai topic badle to naya chat shuru karo aur sirf zaroori facts paste karo, reset rescue se tez hai. A galat hai: ek aur prompt wohi bhara hua chat barhata hai. C galat hai: soch ka masla nahi, window ka masla hai. D galat hai: chat se cheez hata nahi sakte, aur baqi topics phir bhi wahi rahenge.

Yaad rakhne wala rule: Topic badle ya jawab bigre to naya chat, aur sirf zaroori facts saath le jao.

Roman Urdu samajh (scenario aur question):

- Scenario: “Imran ice rink mein operations associate hai. Ek hi lambe chat mein usne staff rota banwaya, phir ticket-sales spreadsheet debug karwai, phir sponsor ko shukriya ka note likhwaya. Ab note mein rota ka zikr aa raha hai, jawab lambe aur dhundle ho gaye hain, aur AI baar baar maafi maang raha hai. Note ek ghante mein jana hai.”
- Question: “Sab se munasib agla qadam kya hai?”
- Key words: rota = duty ka jadwal, debug = ghalti dhoondh kar theek karna, sponsor = sarparast, vague = dhundla, apologise = maafi maangna.

Exam trap aur 3 clues:

1. Deciding detail: “three unrelated topics in one chat” aur “mentions the rota”.
2. Question kya maang raha hai: sahi agla qadam.
3. Trap: A (ek aur clarifying prompt) kyun ke chapter kehta hai is ki aadat mat daalo.

QUESTION 4 OF 13 SELECT TWO

Chapter section: Concept 4, personal instructions layer and Projects

Farah works at a drinks bottler. Every chat she starts, she types “I am a quality officer, use metric units” and, for her weekly line-audit prompts, pastes the same audit checklist and the same report layout. She does this for three weeks in a row. The checklist has not changed. Which TWO setups are most appropriate?

A. Put the job title and the metric-units line in her personal instructions.

B. Rely on memory to carry the checklist, since the AI already knows her.

C. Create a Project that holds the checklist and the report layout.

D. Open a new chat each day and paste everything again to keep it fresh.

Correct Answer: Option A and C

Explanation (Roman Urdu): “Main quality officer hoon, metric use karo” aisi baat hai jo har chat mein lagti hai, ye personal instructions ka kaam hai (A). Checklist aur layout ek hi kaam ke liye baar baar chahiye aur badalte nahi, ye Project ka kaam hai (C). B galat hai: memory AI ka apna note hai, kisi asli checklist ki jagah nahi leta. D galat hai: baar baar paste karna wohi masla hai jo Project hal karta hai.

Yaad rakhne wala rule: Har chat ki baat = personal instructions. Ek kaam ki files = Project.

Roman Urdu samajh (scenario aur question):

- Scenario: “Farah drinks bottler mein kaam karti hai. Har chat mein wo likhti hai ‘main quality officer hoon, metric units use karo’ aur har hafte ke line-audit prompts ke liye wohi checklist aur wohi report layout paste karti hai. Teen hafte se aisa hi ho raha hai. Checklist badli nahi.”
- Question: “Kaun se DO setups sab se munasib hain?”
- Key words: personal instructions = aap ki zaati hidayat jo har chat mein load hoti hain, Project = ek kaam ka workspace, checklist = jaanch ki fehrist, layout = report ka naqsha.

Exam trap aur 3 clues:

1. Deciding detail: “every chat” (har chat ki baat) aur “three weeks, checklist unchanged” (ek kaam ki files).
2. Question kya maang raha hai: “Which TWO”, yaani do sahi jagahen.
3. Trap: B (memory) kyun ke ye asaan lagta hai, par memory file ka badal nahi.

QUESTION 5 OF 13

Chapter section: Concept 5, reasoning (“think hard”) and when not to use it

Kamran is a carpentry estimator choosing between two timber suppliers. He has both price lists, delivery terms, his last six months of order sizes and a note on his cash-

flow limit. He wants the three trade-offs that matter, a recommendation, and the conditions under which it would flip. He has an afternoon to decide. Which request is most appropriate?

A. Attach everything, ask for a quick two-line answer, and skip thinking mode to save time.

B. Ask for ten supplier names from memory and compare them later.

C. Paste only the two price lists and ask "which is cheaper?"

D. Attach everything, say "think hard", and ask for the three trade-offs, a recommendation and when it would flip.

Correct Answer: Option D

Explanation (Roman Urdu): Kamran ke paas bahut saari inputs aur trade-offs hain aur woh ek dopahar rakhta hai, ye bilkul wo sawal hai jahan thinking mode kaam aata hai. Chapter ka power-user pattern: context attach karo, "think hard" likho, aur structured jawab maango (trade-offs, recommendation, kab badle). A galat hai: do line ka jawab itne inputs ko zaaya karta hai. B galat hai: supplier names yaad se maangna alag kaam hai aur yaaddasht par bharosa kamzor hai. C galat hai: baqi zaroori context chhor diya. Yaad rakhne wala rule: Bohat inputs aur trade-offs ho to context attach karo aur "think hard" likho.

Roman Urdu samajh (scenario aur question):

- Scenario: "Kamran carpentry estimator hai aur do lakdi ke suppliers mein se chunna chahta hai. Uske paas dono ki price lists, delivery terms, pichle chhe mahine ke order sizes aur cash-flow ki hadd ka note hai. Usse teen aham trade-offs, ek recommendation aur wo shartein chahiye jin par recommendation badal jaye. Faisle ke liye ek dopahar hai."
- Question: "Kaun si request sab se munasib hai?"
- Key words: trade-off = ek cheez ke badle doosri ka nuksan, recommendation = sifarish, flip = ulat jana, cash flow = naqdi ki aamad o kharch.

Exam trap aur 3 clues:

1. Deciding detail: "many inputs, many trade-offs" aur "an afternoon".
2. Question kya maang raha hai: sahi request ka jumla.
3. Trap: A kyun ke "waqt bachao" sunne mein samajhdaar lagta hai, lekin ye wohi sawal hai jahan thinking ka waqt lagana chahiye.

QUESTION 6 OF 13

Chapter section: Concept 6, sycophancy and neutral wording

Mehreen works in admissions at a language school. She wrote a new course flyer and asks AI: "Tell me this flyer is ready to print, and why it will attract more students." AI

replies that it is excellent. The flyer goes to the printer on Friday, and a print run cannot be undone. Which change to the prompt is most appropriate?

A. Ask the same question again, but in a friendlier tone.

B. Add “be brutally honest” and keep the rest of the wording.

C. Ask for a 1-10 score on named criteria, with the change that would raise each score the most.

D. Ask AI to write a second flyer so she can pick the better one.

Correct Answer: Option C

Explanation (Roman Urdu): “Tell me it is ready” aur “why it will attract” AI ko pehle hi jawab thama dete hain, isliye wo taareef karta hai. Chapter ka fix hai neutral rubric: har criterion par 1-10 score aur wo tabdeeli jo score sab se zyada badhaye. Print wapas nahi hota, isliye honest feedback zaroori hai. A galat hai: tone badalne se bait nahi hatta. B galat hai: “brutally honest” likhna hai, lekin wording ab bhi conclusion maang rahi hai. D galat hai: naya flyer feedback ka badal nahi.

Yaad rakhne wala rule: “Confirm” nahi, rubric dekar score maango.

Roman Urdu samajh (scenario aur question):

- Scenario: “Mehreen language school ki admissions mein kaam karti hai. Usne naye course ka flyer likha aur AI se kaha ‘bata do ke ye print ke liye tayyar hai aur zyada students kyun layega’. AI kehta hai bohat umda hai. Flyer Friday ko printer jayega aur print run wapas nahi hota.”
- Question: “Prompt mein kaun si tabdeeli sab se munasib hai?”
- Key words: flyer = ishtihaar, sycophancy = khushamad, rubric = jaanch ke nuqte, score = number, criteria = mayaar.

Exam trap aur 3 clues:

1. Deciding detail: “tell me it is ready” (bait wording) aur “cannot be undone”.
2. Question kya maang raha hai: prompt ki tabdeeli.
3. Trap: B kyun ke “brutally honest” taqatwar lagta hai, par asli wording phir bhi bait hai.

QUESTION 7 OF 13

Chapter section: Concept 7, the brainstorm-iterate loop and the grip dial

Zubair is a marketing associate at a welfare trust planning a donation drive. He asks AI for five slogans but pins everything: exact tagline, three-part structure, tone, a 12-word cap and five channels. AI returns five near-identical rewordings of one idea, and a request for twenty gives twenty neighbours. The campaign meeting is tomorrow. Which pattern is this, and what is the fix?

A. Context rot; start a new chat and paste the brief again.

B. Over-tight limits for a brainstorm; ask for five truly different directions with only the

true limits.

C. Weak reasoning; turn on thinking mode and ask for ten more.

D. Sycophancy; reword the request to sound more neutral.

Correct Answer: Option B

Explanation (Roman Urdu): Brainstorm mein structure, tone, length sab pin kar dene se AI ke paas sirf ek chhota kona bachta hai, isliye rewordings aate hain. Chapter ka dial kehta hai: options ke waqt sirf asli limits (product, audience, kya nahi chahiye) do; jab ek direction jeet jaye tab full specification wapas lao. A galat hai: chat naya nahi, grip dheela karna hai. C galat hai: ye sochne ka nahi, grip ka masla hai. D galat hai: yahan khushamad nahi, jakdi hui limits hain.

Yaad rakhne wala rule: Options chahiye to grip dheela karo, execution mein grip kaso.

Roman Urdu samajh (scenario aur question):

- Scenario: "Zubair welfare trust mein marketing associate hai aur donation drive ki planning kar raha hai. Wo AI se paanch slogans maangta hai lekin sab kuch pin kar deta hai: exact tagline, teen hisse ka structure, tone, 12 lafzon ki hadd aur paanch channels. AI paanch qareeb-qareeb ek jaise slogans deta hai, aur bees maangne par bees padosi aate hain. Campaign meeting kal hai."
- Question: "Ye kaun sa pattern hai aur fix kya hai?"
- Key words: slogan = naara, tagline = dohrane wala jumla, pin = jakad dena, rewording = alfaaz badal kar wohi baat, neighbours = qareeb ki mushabeh cheezein.

Exam trap aur 3 clues:

1. Deciding detail: "near-identical rewordings" aur "pinned everything".
2. Question kya maang raha hai: do cheezein, pattern aur fix.
3. Trap: C (think hard) kyun ke bura jawab sun kar "zyada soch" pehla khayal hota hai.

QUESTION 8 OF 13

Chapter section: Concept 8, image input: check totals; mark unclear words

Sara works for a hotel planning team. She photographs a handwritten banquet-supplies list with 14 lines and amounts, and asks AI to type it up. The list will be sent to the catering supplier tonight, and a few of the handwritten words are smudged. Which request is most appropriate?

A. "Type it up and guess any smudged words so the list looks complete."

B. "Transcribe it, keep the original wording, mark unclear words as [unclear] with two best guesses, and I will check the totals."

C. "Type it up and add a total at the bottom so I do not have to check."

D. "Summarise the list in three bullets and send it to the supplier."

Correct Answer: Option B

Explanation (Roman Urdu): Chapter kehta hai image se transcription mein [unclear] ka nishan aur do guesses maango, aur totals khud check karo. Supplier ko aaj raat jana hai, isliye ghalat guess ya ghalat total mehngi ghalti hai. A galat hai: guess ko "mukammal" dikhana ghalti chhupata hai. C galat hai: AI ka diya total bhi check hona chahiye. D galat hai: summary asli list ka badal nahi aur bina check bhejna ghalat hai. Yaad rakhne wala rule: Haath ki likhai ko type karwao to [unclear] mark karwao aur totals khud check karo.

Roman Urdu samajh (scenario aur question):

- Scenario: "Sara hotel planning team mein hai. Wo banquet ke saaman ki haath se likhi 14 lines aur amounts wali list ki tasveer leti hai aur AI se type karwana chahti hai. List aaj raat catering supplier ko jani hai, aur kuch likhe hue lafz dhundle hain."
- Question: "Kaun si request sab se munasib hai?"
- Key words: transcribe = likhe huye ko type karna, smudged = dhundla, banquet = dawat, supplier = saaman dene wala, unclear = wazeh nahi.

Exam trap aur 3 clues:

1. Deciding detail: "smudged words" aur list "tonight" supplier ko jani hai.
2. Question kya maang raha hai: sahi request ka jumla.
3. Trap: A aur C kyun ke "mukammal list" aur "total ready" asaan lagte hain, lekin ghalti chhupate hain.

QUESTION 9 OF 13

Chapter section: Concept 9, building small apps with one prompt (Goal, Input, Output)

Hamza runs the sales office of a cement plant and wants a small tool where he enters bag count and price per bag, and sees the total with 5% delivery added. He has no coding experience and wants a first working version this hour. Which request is most appropriate?

A. "Build me an app for cement sales."

B. "Build a multiplayer ordering system with customer accounts and live payments."

C. "Build it: Goal is a bag-cost calculator; Input is bag count and price; Output shows the total with 5% delivery added."

D. "Write the code for a full sales database and explain each line first."

Correct Answer: Option C

Explanation (Roman Urdu): Chapter ka recipe hai Goal, Input, Output, aur chhoti cheez jo ek screen par aaye, bina accounts ya bahar ki services ke. C teeno batata hai. A galat hai: kuch bhi nahi bataya, jawab andaza hoga. B galat hai: multiplayer aur live payments ek prompt ke bas ke nahi. D galat hai: poori database ek prompt se bahut

bari hai, aur explanation ka koi maqsad nahi.
Yaad rakhne wala rule: Chhota app = Goal, Input, Output, ek screen par.
Roman Urdu samajh (scenario aur question):

- Scenario: “Hamza cement plant ke sales office ko chalata hai aur ek chhota tool chahta hai jis mein wo bag ki ginti aur per bag qeemat likhe aur 5% delivery jama karke total dekhe. Usay coding ka tajurba nahi aur is ghante pehla chalta hua version chahiye.”
- Question: “Kaun si request sab se munasib hai?”
- Key words: calculator = hisaab karne wala, input = jo user deta hai, output = jo user dekhta hai, delivery = pohanchane ka kharch.

Exam trap aur 3 clues:

1. Deciding detail: “this hour”, “no coding experience”, chhota hisaab.
2. Question kya maang raha hai: sahi request.
3. Trap: B kyun ke “bara” aur “professional” lagta hai, magar ek prompt ki hadd se bahar hai.

QUESTION 10 OF 13
Chapter section: Concept 10, data analysis: the model may not run code; ask for code and checkable facts
Rabia is a bookings associate at a hostel. She uploads a 2,400-row spreadsheet of last year’s bookings and asks “which months were busiest?” AI replies with a confident paragraph and a round “about 2,000 bookings”, but shows no code. She will send the answer to the owner for the staffing plan tomorrow morning. What is the most appropriate next step?
A. Accept it, since the answer sounds reasonable and round.
B. Ask AI to write and run code, show the code, and first state the exact row count, columns and date range.
C. Ask AI to answer again in a more detailed paragraph.
D. Upload the file again in a new chat and compare the two paragraphs.
Correct Answer: Option B
Explanation (Roman Urdu): Jawab mein koi code nahi aur “about 2,000” suspicious round number hai, shak hai ke AI ne code chalaya hi nahi. Chapter kehta hai seedha kaho “write and run code, show me the code”, aur pehle row count, columns aur date range puchho kyun ke asli parhne par ye sahi aate hain. A galat hai: round aur sahi lagna saboot nahi. C galat hai: zyada tafseeli paragraph bhi andaza ho sakta hai. D galat hai: do andazon ka muqabla koi hisaab nahi.
Yaad rakhne wala rule: Numbers ke liye code chalwao, code dekho, aur row count jaise checkable facts pehle poochho.

Roman Urdu samajh (scenario aur question):

- Scenario: “Rabia hostel mein bookings associate hai. Wo pichle saal ki 2,400 rows wali booking spreadsheet upload karti hai aur puchti hai kaun se mahine sab se masroof the. AI yaqeen se bhara paragraph aur gol ‘about 2,000 bookings’ deta hai magar koi code nahi dikhata. Jawab kal subah staffing plan ke liye owner ko jayega.”
- Question: “Sab se munasib agla qadam kya hai?”
- Key words: spreadsheet = hisaab ka jadwal, busiest = sab se masroof, row count = qataron ki ginti, round number = gol adad.

Exam trap aur 3 clues:

1. Deciding detail: “no code shown” aur “about 2,000”.
2. Question kya maang raha hai: agla qadam.
3. Trap: C kyun ke “tafseeli jawab” mehnat jaisa lagta hai, par computation nahi.

QUESTION 11 OF 13 SELECT TWO

Chapter section: Concept 11, AI desktop apps and the permission ladder

Dilawar is an education officer at a zoo. He wants an AI desktop app to tidy a folder of 180 school-visit PDFs, and he has used the app only twice. The folder has no version control. Which TWO actions are most appropriate?

A. Give read-only access to the single small folder first.

B. Grant full-disk access, so the app does not stop to ask later.

C. Ask for a proposed plan of file moves and renames, and approve it only after reviewing it.

D. Tell the app to go ahead and delete duplicates directly, since it can be undone later.

Correct Answer: Option A and C

Explanation (Roman Urdu): Chapter ki permission ladder: pehle sessions mein sirf ek chhote folder ka read-only access (A), aur pehle plan maango, review karo, phir approve karo (C). B galat hai: sirf do dafa istemal kiya hai, scope track record ke saath barhta hai. D galat hai: chapter kehta hai AI ke delete ki hui files aksar recycle bin mein nahi jaatin aur version control ke baghair edits purane ko overwrite kar dete hain, yani “baad mein undo” ghalat hai.

Yaad rakhne wala rule: App ko pehle chhota folder aur read-only do, aur pehle plan dekho.

Roman Urdu samajh (scenario aur question):

- Scenario: “Dilawar zoo mein education officer hai. Wo AI desktop app se school-visit ki 180 PDFs wala folder saaf karwana chahta hai. App usne sirf do baar chalayi hai. Folder par version control nahi.”
- Question: “Kaun si DO kaarwaiyan sab se munasib hain?”

- Key words: permission = ijazat, read-only = sirf parhna, version control = purane versions mehfooz rakhne wala nizam, duplicate = nakal, scope = daayra.
  Exam trap aur 3 clues:

1. Deciding detail: “used twice” aur “no version control”.
2. Question kya maang raha hai: “Which TWO”, yaani do sahi.
3. Trap: D kyun ke “baad mein undo” sunne mein tasalli deta hai, par chapter ka kehna hai deleted files wapas nahi aatin.
   QUESTION 12 OF 13
   Chapter section: Concept 12, cost and speed: choose by task; run the same prompt in 2-3 models
   Aslam is a sales-office associate at a cement plant and wants a week-by-week price-comparison memo for the board next month. He usually writes it in one AI tool. Last time it missed a point a colleague found later. The memo is worth more than a short email, and he has a quiet afternoon. What is the most appropriate next step?
   A. Keep using the one tool and accept its first draft, since it is his usual choice.
   B. Switch permanently to the newest tool without testing anything.
   C. Send the memo only to a colleague who will agree with it.
   D. Run the same prompt in two or three tools, read the answers side by side, and keep the one that suits this task.
   Correct Answer: Option D
   Explanation (Roman Urdu): Chapter kehta hai AI ki salahiyat asmaan hai (jagged) aur leader har kuch mahine mein badalta hai, isliye ek hi prompt do ya teen models mein chalao aur side by side parho. Is memo ki ahmiyat bhi zyada hai. A galat hai: ek tool par andha bharosa. B galat hai: bina test ke “naya” ko permanent chunna. C galat hai: jo sirf haan karega wo check nahi.
   Yaad rakhne wala rule: Ek tool par shaadi nahi, do-teen tools mein wohi prompt chala kar muqabla karo.
   Roman Urdu samajh (scenario aur question):

- Scenario: “Aslam cement plant ke sales office mein associate hai aur board ke liye agle mahine hafta-wari qeemat ke muqabley ka memo likhna chahta hai. Wo aam taur par ek hi AI tool istemal karta hai. Pichli baar ek nukta reh gaya tha jo colleague ne baad mein dhoonda. Memo chhoti email se zyada ahem hai aur uske paas ek pur-sukoon dopahar hai.”
- Question: “Sab se munasib agla qadam kya hai?”

- Key words: memo = yaaddasht, board = idara ke bade log, side by side = saath saath, jagged = naa-hamwar (ghat-barh).
  Exam trap aur 3 clues:

1. Deciding detail: “missed a point” aur memo ahem hai.
2. Question kya maang raha hai: sahi agla qadam.
3. Trap: A kyun ke “aadat” par chalna aasan hai.
   QUESTION 13 OF 13
   Chapter section: Concept 13, models checking models (different families; humans check the facts that matter)
   Noreen works in a legal-aid office at a welfare trust. She drafted a 30-page guidance note about tenant eviction rules and iterated with one AI model until its own score reached 9. She pastes it into another model from the same company, and it gives a similar score. The note will be published to tenants next week. What is the most appropriate next step?
   A. Publish it, since two models gave a high score.
   B. Ask the first model again whether its score is fair.
   C. Have a model from a different family review it, then have a human expert check the legal claims.
   D. Ask a third model from the same company to score it as well.
   Correct Answer: Option C
   Explanation (Roman Urdu): Chapter kehta hai cross-model check tabhi kaam karta hai jab models alag companies (families) ke hon, kyun ke ek hi family ke models ki aadatein ek jaisi hoti hain. Aur legal baton ke liye koi bhi score insani maahir ka badal nahi: “models craft check karte hain, humans wo facts jo ahem hain.” A galat hai: do ek jaise models ki raazi ko saboot samajhna. B galat hai: apne hi score ko dobara puchna wohi closed loop hai. D galat hai: teesra model bhi usi family ka hai.
   Yaad rakhne wala rule: Alag family ka model, aur legal/medical/financial par insani maahir.
   Roman Urdu samajh (scenario aur question):

- Scenario: “Noreen welfare trust ke legal-aid office mein kaam karti hai. Usne kirayedaaron ki be-dakhli ke qawaid par 30 page ka guidance note likha aur ek AI model ke saath dohra kar uska apna score 9 tak pohancha diya. Phir usne usi company ke dusre model mein paste kiya jis ne milta-julta score diya. Note agle hafte kirayedaaron ke liye shaya hoga.”
- Question: “Sab se munasib agla qadam kya hai?”

- Key words: eviction = be-dakhli, tenant = kirayedaar, family (models) = ek company ke models, expert = maahir.

  Exam trap aur 3 clues:

1. Deciding detail: dono models “same company” ke hain aur legal content hai jo publish hoga.
2. Question kya maang raha hai: sahi agla qadam.
3. Trap: D kyun ke “teesra model” sunne mein bharosa deta hai, par wo bhi wohi family hai.

SUMMARY TABLE

Q	Chapter section tested	Type
1	Concept 1: novice vs power user, four-part briefing	Single
2	Concepts 2 and 3: knowledge cutoff, retrieval modes	Single
3	Concept 4: context rot, new chat	Single
4	Concept 4: personal instructions vs Projects	Select two

11	Concept 11: permission ladder	Select two
12	Concept 12: compare models	Single
13	Concept 13: cross-family checking	Single

Questions where the chapter was thin or I am not fully sure (please verify):

- Q4: The chapter says memory is a note the tool keeps, but it does not say outright that memory cannot hold a checklist. I used the Projects rule (“same files pasted into two chats belongs in a project”) as the deciding point.
- Q5: The chapter does not say that a two-line answer is wrong. It says thinking mode suits questions with many inputs and trade-offs, so I used that.

- Q8: The chapter gives the [unclear] prompt and says to double-check totals. “Totals” is my added detail in the scenario.
- Q11: The “deleted files may skip the recycle bin” and “no edit history without version control” lines are in the chapter. The count of 180 PDFs is my added detail.
- Q12: The chapter says to run the same prompt in 2 to 3 models and not to marry one tool. The memo scenario is my own example.
- Q13: The chapter says models from the same company are not cross-model checking, and a human expert should check legal claims. The 30-page note is my own example.

Exam mein kisi bhi question ko pehchanne ka tareeqa (3 roles, har question mein):

1. Deciding detail: scenario mein wo ek ya do cheezein dhoondo jo jawab tay karti hain (stakes, wapas hone wala ya nahi, kis ne check kiya, kya pehle se maujood hai). Baqi details faltu hoti hain.
2. Question ka kaam: aakhri jumla dekho, wo “next step”, “pattern aur fix”, “which TWO” ya “which request” mein se kya maang raha hai. Select-two mein bilkul do jawab chahiye.
3. Trap: galat options hamesha aadha-sahi hote hain. Common jaal: fix zaroorat se bara (stronger model, naya chat), galat layer (rule knowledge mein, file memory mein), sahi kaam galat waqt par (send ke baad check), AI ke apne bayan par bharosa, aur sahi diagnosis ke saath galat fix.

   Sahi jawab chunne ka tareeqa: pehle deciding detail se chapter ka rule yaad karo, phir har option ko poochho “kya ye is detail se match karta hai, aur kya ye sab se chhota sahi qadam hai?” Jo option dono mein pass ho wohi jawab hai.
