QUESTION 1 OF 13
Chapter section: A human in the loop is not a gate (who, what, when)

An ice rink operations associate uses AI to draft refund replies to customers. Each reply quotes an amount, and sent emails cannot be pulled back. The manager says, “A human will review them.” About 30 replies go out each week. Which review arrangement is most appropriate?

A. The team lead looks over replies whenever she finds a free moment.
B. The front-desk supervisor checks amounts against the ledger before each reply is sent.
C. Keep a human in the loop with appropriate oversight of every reply.
D. Any available colleague reviews the replies after customers receive them.

Correct Answer: Option B

Explanation (Roman Urdu): Chapter ke mutabiq gate mein teen cheezein honi chahiye: kaun check karega, kya check karega, aur kab (kaam wapas na ho sakne se pehle). Option B mein teeno hain: supervisor, amounts vs ledger, aur reply bhejne se pehle. Option A galat hai kyunke “free moment” mein na kab hai na kya, ye sirf irada hai. Option C galat hai kyunke ye wohi mubham jumla hai jo chapter ne “not a gate” kaha. Option D galat hai kyunke check bhejne ke BAAD hai, jab email wapas nahi ho sakti.

Yaad rakhne wala rule: Gate = kaun, kya, kab. Teeno na ho to wo gate nahi, sirf irada hai.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “uses AI to draft refund replies” = AI se paise wapas karne ke jawab likhwata hai.
  - “Each reply quotes an amount” = har jawab mein ek raqam likhi hoti hai.
  - “sent emails cannot be pulled back” = bheji hui email wapas nahi li ja sakti (irreversible).
  - “A human will review them” = koi insaan dekh lega (mubham).
  - “30 replies each week” = hafte ke 30 jawab (extra detail).
- *Mushkil lafz:* ledger = hisaab ki bahi. oversight = nigrani. arrangement = intezam.
- *Question line:* “Which review arrangement is most appropriate?” = kaun sa review intezam sab se munasib hai?
- Exam trap: “Human in the loop” sunne mein achha lagta hai (C), lekin isme who/what/when nahi.

QUESTION 2 OF 13
Chapter section: The Case, finding the deciding factor

A timber merchant's sales manager asks AI to draft a condolence note to a client of 20 years whose father has died. The note is only four lines and easy to rewrite before sending, and the facts in it are minimal. The manager wants to know which of the four screens carries this classification. Which is most likely the deciding factor?

A. Reversibility, because a draft can be rewritten before it is sent.
B. Consequence of error, because a mistake would be expensive.
C. Accountability, because the company answers for factual claims.
D. Human judgment or empathy, because the relationship should be personally owned.

Correct Answer: Option D

Explanation (Roman Urdu): Chapter ki misaal bilkul yahi hai: condolence message likhna asaan hai aur dobara likha ja sakta hai, phir bhi deciding factor insani rishta hota hai. Option A galat hai kyunke reversibility yahan agree karti hai, magar wo kaam ko badalti nahi, factor wo hai jo classification ko hilaye. Option B galat hai kyunke kisi mehnge nuqsaan ka zikr scenario mein nahi. Option C galat hai kyunke note mein koi factual claim nahi, ye billing reply jaisa case nahi.

Yaad rakhne wala rule: Deciding factor wo hai jis ke badalne se classification badal jaye. Rishte wale kaam mein wo insani rishta hota hai.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "timber merchant" = lakri ka tajir.
  - "condolence note" = afsos (taziyat) ka paigham.
  - "client of 20 years" = 20 saal purana gahak.
  - "easy to rewrite" = dobara likhna asaan.
- *Mushkil lafz:* deciding factor = faisla karne wali wajah. screen = jaanchne ka sawal. empathy = dusre ka dard samajhna.
- *Question line:* "Which is most likely the deciding factor?" = sab se mumkin faisla-kun wajah kaun si hai?
- Exam trap: "Aasani se rewrite ho jata hai" dekh kar reversibility (A) chun lena.

QUESTION 3 OF 13
Chapter section: The Data, the discriminator (identifiers or only the pattern)

A marketing officer at a city bus operator has a spreadsheet of 8,000 pass-holders with names and account numbers. She wants AI to find which routes show falling

spend. Company policy restricts customer identifiers, and she has an approved AI workspace. Which step is most appropriate?

A. Remove names and account numbers, check that no mapping list travels with the file, then run the analysis.
B. Upload it as it is, because the workspace is already approved.
C. Upload it with an instruction telling the model not to retain the data.
D. Skip the analysis, since the file contains restricted identifiers.

Correct Answer: Option A

Explanation (Roman Urdu): Chapter ka sawal hai: task ko identifiers chahiye ya sirf pattern? Route-wise spend trend ko naam nahi chahiye, is liye identifiers hata kar (aur mapping list sath na jaye) analysis chalana sahi hai. Option B galat hai kyunke approved workspace ka matlab har data ki ijazat nahi. Option C galat hai kyunke "retain mat karo" ek khwahish hai, control nahi. Option D galat hai kyunke kaam chhor dena bhi bina zarurat ka nuqsaan hai (abandonment).

Yaad rakhne wala rule: Pehle poochho: identifiers chahiye ya sirf pattern? Pattern ho to hatao, phir verify karo.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "city bus operator" = shehar ki bus chalane wali company.
  - "8,000 pass-holders with names and account numbers" = 8,000 pass walon ke nam aur account number.
  - "routes show falling spend" = kaun se raaste par kharch ghat raha hai.
  - "approved AI workspace" = manzoor-shuda AI jagah (jaal: approved hona kafi nahi).
- *Mushkil lafz:* identifiers = pehchan wale details. retain = mehfooz rakhna. mapping list = wo fehrist jis se label wapas asal insaan tak jaye.
- *Question line:* "Which step is most appropriate?" = kaun sa qadam sab se munasib hai?
- Exam trap: Do jaal: "approved hai to upload kar do" (B) aur "restricted hai to kaam hi chhor do" (D). Dono "pattern chahiye" wali branch ko ignore karte hain.

QUESTION 4 OF 13
Chapter section: Redaction and pseudonymized data

A hotel revenue analyst replaces guest names with "Guest 17", "Guest 18" and so on before asking AI to review loyalty-scheme trends. The sheet that links each label to a real guest is saved in a shared folder that the front-office team can open. He wants to

treat the file as anonymous and handle it as green data. Which statement is most appropriate?

A. It is anonymous now, because the visible names have been removed.
B. It is yellow only until the file reaches the AI tool, then it becomes green.
C. It is pseudonymized and keeps its tier, because the labels can still be traced back.
D. It is anonymous once the column heading “Guest” is deleted from the sheet.

Correct Answer: Option C

Explanation (Roman Urdu): Chapter kehta hai: “Customer 17” sirf pehla qadam hai. Agar kisi ke paas mapping list hai to data pseudonymized hai, aur wo apna tier (yellow ya red) barqarar rakhta hai. Yahan front-office list khol sakta hai, is liye C sahi hai. Option A galat hai kyunke naam hatana kafi nahi, link maujood hai. Option B galat hai kyunke tool tak pohanchne se tier nahi badalta. Option D galat hai kyunke heading mitane se link nahi toota.

Yaad rakhne wala rule: Mapping list kisi ke paas ho to data anonymous nahi, pseudonymized hai aur tier wahi rehta hai.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “replaces guest names with Guest 17” = mehmano ke nam ki jagah “Guest 17” likhta hai.
  - “loyalty-scheme trends” = wafadari-scheme ke rujhan.
  - “sheet that links each label to a real guest” = wo sheet jis mein label ke samne asal mehman likha hai.
  - “shared folder… front-office can open” = sab ke liye khuli hui folder.
- *Mushkil lafz:* anonymous = jis se pehchan mumkin hi na ho. pseudonymized = naqli label, jo wapas traced ho sakta hai. tier = hifazat ka darja.
- *Question line:* “Which statement is most appropriate?” = kaun sa bayan sab se munasib hai?
- Exam trap: “Naam hata diye to anonymous” (A). Asal sawal ye hai ke mapping list kis ke paas hai.

QUESTION 5 OF 13 — SELECT TWO
Chapter section: Claude routes and controls (privacy features vs authorization)

A language school’s admissions coordinator is deciding whether to put applicant files into Claude on a personal Pro account. She wants to know what the privacy features actually tell her. Which TWO statements are correct?

A. An incognito chat shows the data was permitted to enter, so no further route check is needed.
B. Incognito chats still follow a documented default retention period of 30 days.
C. On Free, Pro and Max, privacy settings decide whether chats may be used for training.
D. A code sandbox shows a sensitive file was authorized for that environment.

Correct Answer: Option B and C

Explanation (Roman Urdu): Chapter likhta hai ke incognito ka matlab zero retention nahi, Anthropic ki documented default retention 30 din hai. Aur Free, Pro, Max par training use aap ki privacy settings par depend karta hai. Isi liye B aur C sahi hain. Option A galat hai kyunke incognito history aur memory ke baare mein hai, ijazat ke baare mein nahi. Option D galat hai kyunke sandbox execution ki hadd hai, data ki manzoori nahi.

Yaad rakhne wala rule: Privacy control ek chhote khatre ko rokta hai, "data andar ja sakta tha ya nahi" ka jawab nahi deta.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "language school's admissions coordinator" = zubaan school ki dakhla coordinator.
  - "applicant files" = darkhwast dene walon ki files.
  - "personal Pro account" = zaati Pro account (company ka nahi).
  - "what the privacy features actually tell her" = privacy features asal mein kya batate hain.
- *Mushkil lafz:* incognito = history mein na aane wala chat. retention = kitne din data rakha jata hai. sandbox = band jagah jahan code chalta hai. authorized = ijazat-shuda.
- *Question line:* "Which TWO statements are correct?" = kaun se DO bayan durust hain?
- Exam trap: Select-two mein A aur D "feature = permission" wale jaal hain.

QUESTION 6 OF 13
Chapter section: The Capability, enable / escalate / decline

A subtitling studio's project lead finds a Skill on a public forum that turns meeting notes into summaries. A colleague used it for a week and loved it. The publisher is unknown, and the Skill's instructions go well beyond meeting notes. The studio's sessions can reach client scripts and shared drives. What is the most appropriate next step?

A. Enable it on a trial basis and watch how it behaves for a week.
B. Enable it, because a colleague has already tested it successfully.
C. Enable it if its description matches the summarizing job.
D. Escalate it to the admin, naming the unknown publisher and the broad reach.

Correct Answer: Option D

Explanation (Roman Urdu): Chapter kehta hai Skill ka apna permission list nahi hota, wo wahi sab chhoo sakta hai jo session chhoo sakta hai. Yahan publisher anjaan hai aur instructions kaam se bahar hain, is liye specific sawal ke sath escalate (ya decline) karna sahi hai. Option A galat hai kyunke access pehle de diya aur khatra baad mein samjha. Option B galat hai kyunke colleague ki sifarish garmjoshi hai, vetting nahi. Option C galat hai kyunke sirf description par bharosa karna scope creep nahi pakadta.

Yaad rakhne wala rule: Anjaan publisher aur bara reach ho to escalate karo ya decline, enable karke dekhna nahi.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “public forum” = aam online forum.
  - “turns meeting notes into summaries” = meeting ke notes ko khulasa banata hai.
  - “publisher is unknown” = banane wala anjaan hai.
  - “instructions go well beyond meeting notes” = hidayaat meeting notes se kahin zyada pheli hui hain.
  - “client scripts and shared drives” = gahakon ki scripts aur shared drives (reach bara hai).
- *Mushkil lafz:* Skill = AI ko ek kaam sikhane wale hidayaat. escalate = zimmedar tak le jana. reach = kya kuch chhoo sakta hai.
- *Question line:* “most appropriate next step” = agla munasib qadam.
- Exam trap: “Colleague ne use kiya, theek hai” (B) aur “pehle try karke dekho” (A).

QUESTION 7 OF 13
Chapter section: Internal does not mean vetted

A drinks bottler’s quality officer wants to use a Skill built by the company’s data team to review supplier contracts. It is shared on the internal drive, and the data team built it last year for less sensitive purchasing data. Supplier contracts are confidential, and company policy was updated in March. Which step is most appropriate before enabling it?

A. Confirm with the data team what it accesses and why, and check its reach against current policy.
B. Enable it, because anything built inside the company has been vetted.
C. Enable it after reading its summary line and checking that the task matches.
D. Ask an AI assistant to certify that the Skill is safe.

Correct Answer: Option A

Explanation (Roman Urdu): Chapter ka hissa “Internal does not mean vetted” kehta hai: doosri team ne apni suhulat ke liye bara reach diya ho sakta hai, ya policy badal chuki ho. Apne data par enable karne se pehle publisher se poochho ke wo kya access karta hai aur kyun, aur reach ko maujooda policy se milao. Option B galat hai kyunke “internal” ka ehsaas vetting nahi hai. Option C galat hai kyunke summary line ya description asal kaam nahi batati. Option D galat hai kyunke AI se “safe” ka certificate lena chapter ne mana kiya hai.

Yaad rakhne wala rule: “Internal” ka matlab “check ho chuka” nahi. Publisher se poochho aur policy se milao.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “drinks bottler’s quality officer” = mashroob bottle karne wali company ka quality afsar.
  - “Skill built by the data team” = data team ki banayi hui Skill.
  - “built last year for less sensitive purchasing data” = pichle saal kam hassas khareed data ke liye bani.
  - “policy was updated in March” = March mein policy badli.
- *Mushkil lafz:* vetted = jaanch-parakh ho chuka. certify = tasdeeq karna. reach = pohanch.
- *Question line:* “Which step is most appropriate before enabling it?” = enable karne se pehle kaun sa qadam munasib hai?
- Exam trap: “Apni hi company ki cheez hai, theek hogi” (B).

QUESTION 8 OF 13
Chapter section: Trusted tool, untrusted content

A hostel bookings associate sets up a well-known, trusted email tool so AI can read incoming guest messages, issue refunds and send replies. Some guest emails are long forwarded threads written by outsiders. Refunds paid out cannot be recovered easily. Which setup is most appropriate?

A. Switch to an email tool from a more famous publisher before turning it on.
B. Stop AI from reading incoming guest emails altogether.
C. Let AI read what it needs, but keep refunds and sending behind a human gate.
D. Keep the current setup, because the publisher of the tool is trusted.

Correct Answer: Option C

Explanation (Roman Urdu): Chapter kehta hai tool kisne banaya aur content kisne likha, ye do alag trust sawal hain. Trusted tool bhi bahar ka likha content parh sakta hai jo prompt injection se AI ko behka de. Is liye AI ko parhne do, magar send, pay, delete jaise na-wapas-hone wale kaam insaan ke gate ke peeche rakho. Option A galat hai kyunke publisher badalna masle ki jarr nahi, khatra content mein hai. Option B galat hai kyunke ye zarurat se bara fix hai, parhna theek hai. Option D galat hai kyunke trusted publisher content ki hifazat nahi karta.

Yaad rakhne wala rule: Khatra "parhne wale bahar ke content" mein hai. Na-wapas-hone wale kaam insaan ke gate ke peeche.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "hostel bookings associate" = hostel ki booking wali staff.
  - "well-known, trusted email tool" = mashhoor aur bharose-mand email tool.
  - "read incoming guest messages, issue refunds and send replies" = aane wale paigham parhe, refund kare, jawab bheje.
  - "forwarded threads written by outsiders" = bahar walon ke likhe hue aage-bheje gaye thread.
  - "cannot be recovered easily" = wapas nahi aate.
- *Mushkil lafz:* prompt injection = content mein chhupe hukm jo AI ko behkate hain. gate = insaan ki manzoori ka darwaza.
- *Question line:* "Which setup is most appropriate?" = kaun sa intezam munasib hai?
- Exam trap: "Tool trusted hai to sab theek" (D) aur "bilkul band kar do" (B).

QUESTION 9 OF 13 — SELECT TWO
Chapter section: The People, look at who was excluded

An HR associate at a cement plant uses AI to cut 200 technician applications down to a shortlist of 15. The plant manager interviews only those 15 and has never seen the other 185. The associate wants a control that deals with the chance that AI unfairly removed a group. Which TWO controls are most appropriate?

A. Sample the dropped applications as well as the shortlisted ones.
B. Review the 15 shortlisted candidates more carefully.
C. Ask the AI to confirm that its own screening was fair.
D. Have the hiring owner review inclusion and exclusion decisions before anyone is contacted.

Correct Answer: Option A and D

Explanation (Roman Urdu): Chapter ka khatra ye hai ke jab AI set ko chhota karta hai aur insaan sirf bachne walon ko dekhte hain, to nikale gaye logon par kisi ki nazar nahi hoti. Control ye hai ke exclusions ka bhi sample liya jaye (A) aur hiring owner inclusion aur exclusion dono ko kisi se rabta karne se pehle dekhe (D). Option B galat hai kyunke sirf survivors dekhne se asal masla chhoot jata hai. Option C galat hai kyunke AI khud ki fairness ka check kamzor check hai.

Yaad rakhne wala rule: Sirf bache hue nahi, nikale gaye logon ko bhi dekho.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "200 applications down to a shortlist of 15" = 200 darkhwaston se 15 chun liye.
  - "interviews only those 15" = sirf unhi 15 ka interview.
  - "never seen the other 185" = baqi 185 kabhi dekhe hi nahi.
  - "unfairly removed a group" = kisi gharoh ko na-insafi se nikalna.
- *Mushkil lafz:* shortlist = chuni hui fehrist. exclusion = nikala jana. sample = chhota hissa utha kar dekhna.
- *Question line:* "Which TWO controls" = kaun se DO control.
- Exam trap: Option B "zyada dhyan se dekho" achha lagta hai, magar ghalat logon ko dekh raha hai.

QUESTION 10 OF 13
Chapter section: Disclosure, the AI notetaker in the meeting

A zoo education officer wants an AI notetaker to join a video call with 12 parents about a school-holiday programme. The parents discuss children's names and allergies. The call is tomorrow at 10 a.m., and the officer thinks of the notetaker as routine tooling. Which approach is most appropriate?

A. Skip any announcement, since a notetaker is routine tooling.
B. Announce it at the start, check the route and consent rules, and review the summary first.

C. Let it join quietly and mention it to the parents afterwards.
D. Announce it only if one of the parents asks about it.

Correct Answer: Option B

Explanation (Roman Urdu): Chapter kehta hai notetaker ek participant hai jo poori baat-cheet tak pohanchta hai, is liye saare logon ko shuru mein bata dena chahiye. Kuch jagah har participant ki razamandi zaroori hoti hai, recording ka route check hona chahiye, aur summary circulate hone se pehle review honi chahiye. Option A galat hai kyunke ise routine samajhna chapter ke mutabiq ghalti hai. Option C galat hai kyunke baad mein pata chalna bharosa tordta hai. Option D galat hai kyunke poochne ka intezar chhupane ke barabar hai.

Yaad rakhne wala rule: Notetaker bhi participant hai: shuru mein batao, route check karo, summary review karo.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "AI notetaker" = AI jo meeting ke notes likhta hai.
  - "video call with 12 parents" = 12 walidain ke sath video call.
  - "children's names and allergies" = bachon ke nam aur allergy (hassas data).
  - "tomorrow at 10 a.m." = extra detail.
- *Mushkil lafz:* disclosure = batana. consent = razamandi. circulate = sab mein bhejna.
- *Question line:* "Which approach is most appropriate?" = kaun sa tareeqa munasib hai?
- Exam trap: "Routine tool hai, batane ki zarurat nahi" (A).

QUESTION 11 OF 13
Chapter section: What to do when something goes wrong (first-hour procedure)

A restaurant manager realises she pasted a staff roster with phone numbers into an AI chat that the group has not approved. Her first instinct is to delete the chat and hope nobody notices. She has not yet shared the output with anyone. Which step is most appropriate?

A. Stop copying anything onward, record the facts, and report promptly through the incident path.
B. Delete the chat first, and report only if someone asks about it.
C. Wait a day to understand what happened before telling anyone.
D. Decide herself whether the staff should be told and delete the evidence.

Correct Answer: Option A

Explanation (Roman Urdu): Chapter ka pehle-ghante ka tareeqa hai: phailna roko, haqaiq likho, incident path se jaldi report karo, aur incident owner ki hidayat par chalo. Option B galat hai kyunke delete karne se aap ki nazar se data hat'ta hai, vendor ke records se nahi, aur ye chhupane jaisa ban jata hai. Option C galat hai kyunke waqt kamyabi se zyada ahem hai, perfect wazahat ka intezar nahi karna. Option D galat hai kyunke deletion aur notification ka faisla incident owner ka hai, aap ka nahi.

Yaad rakhne wala rule: Roko, likho, report karo. Delete mat karo aur apne faisle mat karo.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "staff roster with phone numbers" = staff ki fehrist, phone numbers ke sath.
  - "AI chat that the group has not approved" = aisa AI chat jo group ne manzoor nahi kiya.
  - "delete the chat and hope nobody notices" = chat mita do aur umeed rakho kisi ko pata na chale.
  - "has not yet shared the output" = abhi aage nahi bheja (extra detail).
- *Mushkil lafz:* incident = hadsa/masla. evidence = saboot. notify = ittela dena.
- *Question line:* "Which step is most appropriate?" = kaun sa qadam munasib hai?
- Exam trap: "Delete kar do, kisi ko pata nahi chalega" (B). Ye ghalti ko chhupane mein badal deta hai.

QUESTION 12 OF 13 — SELECT TWO
Chapter section: Why governance drifts (friction rule and auditing the process)

A welfare trust's audit finds that caseworkers often paste notes into a personal chat account. The approved route takes ten steps, and the personal chat takes one. The trust has 14 caseworkers, and the audit was done last quarter. Which TWO responses are most appropriate?

A. Send all staff a reminder email about the approved tools.
B. Ask what makes the approved way harder than the unsafe one, and fix that friction.
C. Treat the audit as a search for system gaps, not as a judgment of individuals.
D. Add the audit results to each caseworker's performance review.

Correct Answer: Option B and C

Explanation (Roman Urdu): Chapter ka friction rule hai: dus qadam wala approved raasta aur ek qadam wala unapproved raasta ho to log jaldi mein aasan raasta chunte hain, is liye poochho ke approved raasta mushkil kyun hai aur use theek karo (B). Dusra, audit process ka hota hai, insaan ka nahi, warna log sirf saaf-suthra kaam dikhate hain (C). Option A galat hai kyunke reminder se asal masla, friction, nahi hilta. Option D galat hai kyunke audit ko chhupi performance review bana dene se visibility khatam hoti hai.

Yaad rakhne wala rule: Approved raasta aasan karo aur audit process ka karo, insaan ka nahi.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "welfare trust's audit" = fallahi idare ka jaiza.
  - "personal chat account" = zaati chat account.
  - "approved route takes ten steps" = manzoor raaste mein dus qadam lagte hain.
  - "14 caseworkers" = extra detail.
- *Mushkil lafz:* friction = kaam mein rukawat. audit = jaiza. performance review = karkardagi ka jaiza.
- *Question line:* "Which TWO responses" = kaun se DO jawab.
- Exam trap: "Reminder email bhej do" (A) sab se aam jaal hai. Chapter ke mutabiq ye reminder se zyada friction ka masla hai.

QUESTION 13 OF 13
Chapter section: When there is no AI policy

A small carpentry firm has no AI policy. Two estimators already use AI for quotes, and one asks the owner what they are allowed to do. The owner is busy until next week. The estimator wants to move things forward without overstepping. Which action is most appropriate?

A. Write a policy and circulate it to the team as the firm's official rules.
B. Wait until the owner has time, and keep using AI as before.
C. Draft a one-page interim proposal and send it to the owner to endorse.
D. Copy a policy from another firm and begin applying it straight away.

Correct Answer: Option C

Explanation (Roman Urdu): Chapter kehta hai ke policy na ho to apni taraf se policy bana kar official mat batao, balke ek page ka interim proposal likh kar sahi malik ko endorse karne ke liye bhejo. Isme manzoor products, data types jin ke liye confirm

karna hai, human-gate rule, naye extensions ka review rule, aur sawalon ka ek zimmedar hota hai. Option A galat hai kyunke apni likhi cheez ko official dikhana ghalat hai. Option B galat hai kyunke intezar ke dauran khatra jaari rehta hai. Option D galat hai kyunke doosri firm ki policy aap ke hisaab se manzoor nahi.

Yaad rakhne wala rule: Policy na ho to proposal likho aur malik se endorse karwao, khud official mat banao.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "small carpentry firm has no AI policy" = chhoti barhai firm jis ki koi AI policy nahi.
  - "Two estimators already use AI for quotes" = do andaza-lagane wale pehle se AI se quote bana rahe hain.
  - "owner is busy until next week" = malik agle hafte tak masroof hai.
  - "without overstepping" = apni hadd se bahar jaye baghair.
- *Mushkil lafz:* interim = waqti. endorse = manzoori dena. circulate = baantna.
- *Question line:* "Which action is most appropriate?" = kaun sa amal munasib hai?
- Exam trap: "Khud policy bana kar official kar do" (A) pehal karne jaisa lagta hai, lekin chapter mana karta hai.

Summary table

Q	Chapter section tested	Type
1	Gate = who, what, when	Single
2	The Case: deciding factor	Single
3	The Data: identifiers or only pattern	Single
4	Pseudonymized data keeps its tier	Single
5	Claude privacy features vs authorization	Select two
6	Capability: enable / escalate / decline	Single
7	Internal does not mean vetted	Single
8	Trusted tool, untrusted content	Single
9	The People: sample exclusions	Select two
10	Disclosure: AI notetaker	Single
11	First-hour incident procedure	Single
12	Drift: friction rule and process audit	Select two
13	No AI policy: interim proposal	Single

Questions to verify yourself

- Q2: The chapter says the human relationship “may be” the deciding factor for a condolence message. It does not give a final classification, so I asked only about the factor.
- Q4: The chapter says pseudonymized data “keeps its tier”. The yellow or red tier depends on your organization’s policy, so I did not name one.
- Q10: The chapter says “announce it at the start” and mentions consent rules in some places. The “check the route” part comes from the chapter’s general route rule, not a notetaker-specific line.
- Q12 (option D): The chapter warns against turning an audit into a “hidden performance review”. Adding results to performance reviews is my example of that, not a line from the chapter.
- Q5: The 30-day retention and the training rules come from the chapter’s September 2026 Claude notes. Check current documentation if your exam uses newer figures.

3 rules for recognising any exam question

Rule 1: Read the last line first and name the question type.

- “Next step?” means one smallest sufficient action.
- “Which pattern and fix?” means diagnosis and fix must both match.
- “Which TWO?” means exactly two options are right, each correct on its own.

Rule 2: Find the deciding details in the scenario.

- Stakes.
- Can it be undone?
- Who checks, and when?
- Who wrote the content, and who published the tool?
- Is anyone looking at who was left out?

Ignore the harmless extras: numbers like 14 caseworkers or 30 replies, the time of the call, or last quarter’s audit.

Rule 3: Name the trap in each wrong option, then pick the smallest fix that matches the chapter rule. Common traps in this set:

- A feature treated as permission (approved tool, incognito, sandbox, “do not retain”).
- A vague review (“human in the loop”) with no who, what or when.
- “Internal” or “colleague used it” taken as proof of safety.
- A check done after the act, or done by the AI itself.

- Deleting or hiding instead of reporting.
- Fixing the wrong layer (reminder email instead of friction, new publisher instead of a human gate).

If two options both look right, ask which one matches the deciding detail from Rule 2. The other will fail on timing, on who checks, or on what was actually authorized.
