Freight aur library scenarios ke liye sahi options tayyar karna.

QUESTION 1 OF 13

Chapter section: Concept 2, give AI the outcome, not the clicks

Hira manages a restaurant and needs the best chicken supplier for next month's menu. She types: "Open only Supplier A and Supplier B websites, copy the three cheapest chicken products from each into a table, then tell me which is best." The table looks neat, but she later learns that a cheaper local supplier exists and AI never looked at it. Her coffee machine was also being repaired that morning. Which change to the prompt is most appropriate?

A. Add more detailed steps so every column and every site visit is spelled out.

B. Describe the finished result in one sentence with two limits, and let AI choose the sources.

C. Keep the steps, but tell AI to double-check each website before it copies anything.

D. Keep the steps, but ask AI to state how confident it is in each supplier.

Correct Answer: Option B

Explanation (Roman Urdu): Hira ne AI ko sirf do websites tak band kar diya tha, is liye AI ne sasta local supplier dekha hi nahi. Chapter kehta hai ke outcome batao (kya cheez bani hui honi chahiye) aur raaste ka faisla AI par chhodo, kyun ke tumhara plan hi hadd ban jata hai. Is liye "ek jumla natija + do limits" sahi hai. A galat hai: aur steps likhne se plan aur tang hota hai. C galat hai: double-check sirf wahi do sites dobara dekhega, galat plan phir bhi galat rahega. D galat hai: confidence puchne se method ki ghalti theek nahi hoti.

Yaad rakhne wala rule: Steps nahi, natija likho. Jab tumhara plan hi limit ban jaye, tab recipe chhod kar outcome sentence likho.

Roman Urdu samajh (scenario aur question):

- Scenario: "Hira ek restaurant manage karti hai aur agle mahine ke menu ke liye sab se behtareen chicken supplier chahti hai. Wo likhti hai: sirf Supplier A aur B ki websites kholo, har ek se teen sasti chicken products table mein copy karo, phir batao kaun sa best hai. Table saaf lagta hai, lekin baad mein pata chalta hai ke ek sasta local supplier tha jise AI ne dekha hi nahi. (Coffee machine ka zikr bas faltu detail hai.)"
- Question: "Prompt mein kaun si tabdeeli sab se munasib hai?"
- Key words: outcome = anjaam/natija, limit = hadd, sources = zariye/jagahein jahan se maloomat aaye, double-check = dobara jaanchna, confident = yaqeen ka darja.

Exam trap aur 3 clues:

1. Deciding detail: “only Supplier A and B” plus “AI never looked at the cheaper one”. Matlab plan ki hadd ne nuksan kiya.
2. Question kya maang raha hai: prompt ki tabdeeli, yaani prompt ko theek karna, AI se kuch aur puchna nahi.
3. Trap: A, C aur D teeno recipe ko rakhte hain. Jo option recipe ko hi bacha kar chale, wo trap hai.

   QUESTION 2 OF 13

   Chapter section: Concept 3, the six-line Delegation Brief (Authority)

   Usman is a bookings associate at a hostel. His brief for comparing three booking-platform fee structures has Outcome, Context, Constraints, Deliverable and Verification lines, but no Authority line. AI quietly left out one platform because its fees “looked too complex”, and Usman only noticed when the table had two columns instead of three. The report is due in two hours. Which pattern is this, and what is the fix?

   A. Missing Context line; add the hostel’s size and number of rooms.

   B. Missing Verification line; list what he will check before accepting.

   C. Missing Deliverable line; spell out the exact columns of the table.

   D. Missing Authority line; state what AI may decide alone and that it must say when it chose.

   Correct Answer: Option D

   Explanation (Roman Urdu): Is scenario mein AI ne khamoshi se ek platform nikal diya, yaani ek faisla bina bataye le liya. Chapter ke mutabiq Authority line wo hai jo batati hai AI kya akele tay kar sakta hai aur kya poochna hai; usi ke baghair AI chupke se faisle karta hai. “Choose, but say when you chose” isi ka fix hai. A galat hai: Context se hostel ka size pata chalta, lekin silent decision nahi rukta. B galat hai: Verification baad mein check karne ke liye hai, magar masla faisle ka tha. C galat hai: Deliverable ke columns theek hote to bhi AI platform hata sakta tha.

   Yaad rakhne wala rule: Jab AI ne bina bataye faisla kiya ho, to missing line Authority hai.

   Roman Urdu samajh (scenario aur question):

- Scenario: “Usman ek hostel mein bookings associate hai. Wo teen booking platforms ki fees compare karwa raha hai. Uske brief mein chhe mein se paanch lines hain, Authority wali line nahi hai. AI ne chupke se ek platform nikal diya kyun ke uski fees ‘bohat complex lagi’. Usman ko tab pata chala jab table mein teen ke bajaye do columns the. Report do ghante mein deni hai.”
- Question: “Ye kaun sa pattern hai aur fix kya hai?”

- Key words: pattern = tarz/qism ki ghalti, quietly = khamoshi se, Authority = ikhtiyar (AI ko kya khud tay karne ki ijazat hai), fix = ilaaj.

Exam trap aur 3 clues:

1. Deciding detail: “quietly left out”, yaani AI ne bina bataye faisla kiya.
2. Question kya maang raha hai: do cheezein, pattern ka naam AUR fix. Dono sahi honi chahiye.
3. Trap: B (Verification) kyun ke wo bhi “check” se judta hai. Par jahan masla “AI ne khud tay kar liya” ho, wahan Authority.

QUESTION 3 OF 13

Chapter section: Concept 4, research: searched versus remembered, citation is not verification

Mehwish is an operations associate at an ice rink. Before a 3 p.m. meeting she asks AI, with the line “use current information”, for the annual service prices of three ice-resurfacer maintenance firms. AI returns a table and says it “searched”, but no price has a page or a date next to it. The contract under discussion is worth several months of the rink’s budget. What is the most appropriate next step?

A. Use the table, since AI said it searched.

B. Switch on deep research and rerun it for a fuller report.

C. Ask for each price’s page and date, then open one and find the supporting sentence.

D. Rerun it in a fresh chat and keep the prices that match.

Correct Answer: Option C

Explanation (Roman Urdu): Chapter kehta hai ke agar current claim bina source ke aaye to ye na maano ke AI ne dekha hai, chahe wo khud kahe. Sahi qadam ye hai ke har price ka page aur date maango, phir ek page khol kar wo jumla dhoondo jo claim ko support karta hai. Bara contract hai, is liye asli check zaroori hai. A galat hai: AI ka apna dawa saboot nahi. B galat hai: deep research report ke liye hai, ek fact ki jaanch ke liye nahi. D galat hai: do baar ek jaisi baat aana sach hone ka saboot nahi.

Yaad rakhne wala rule: Source kholo, jumla dhoondo, date dekho. Citation hona verification nahi, citation ko check karna verification hai.

Roman Urdu samajh (scenario aur question):

- Scenario: “Mehwish ek ice rink mein operations associate hai. 3 baje ki meeting se pehle wo AI se ‘current information use karo’ keh kar teen firms ki saalana service prices maangti hai. AI table deta hai aur kehta hai usne ‘search’ kiya, lekin kisi price ke saath page ya date nahi. Contract rink ke kai mahine ke budget jitna hai.”
- Question: “Sab se munasib agla qadam kya hai?”

- Key words: searched = talash kiya, source = zariya/page, supporting sentence = wo jumla jo baat ki tasdeeq kare, deep research = gehri tehqeeq wala mode jo report banata hai.

  Exam trap aur 3 clues:

1. Deciding detail: “no price has a page or a date” aur “several months of budget” (stakes ziada).
2. Question kya maang raha hai: “next step”, yaani abhi sab se pehla sahi kaam.
3. Trap: A (AI par bharosa) aur D (do baar match). Dono mein khud source nahi khola jata.

   QUESTION 4 OF 13 SELECT TWO

   Chapter section: Concept 5, give AI the source (stay inside it, “not in the source”)

   Farhan, a quality officer at a drinks bottler, pasted the text of a supplier’s cap-liner certificate into a chat. He had already removed all contact names and phone numbers. He asked three questions: shelf life, test temperature and required storage humidity. AI answered all three confidently, but the certificate never mentions humidity, and he cannot tell which answers came from the text. Which TWO changes to the prompt are most appropriate?

   A. Tell AI to use only the pasted text and to quote the sentence behind each answer.

   B. Move the certificate into a Project as knowledge so AI always has it available.

   C. Tell AI to write “not in the source” for anything the text does not state.

   D. Open a temporary chat so the answers are not saved to his history.

   Correct Answer: Option A and C

   Explanation (Roman Urdu): Humidity certificate mein hai hi nahi, phir bhi AI ne jawab de diya, yaani apni yaaddasht se bhar diya. Chapter ke mutabiq source ko source banane ke liye do hidayat chahiye: “sirf diya gaya text use karo aur wo jumla quote karo” (A), aur “agar text nahi batata to ‘not in the source’ likho” (C). B galat hai: ye ek hi dafa ka kaam hai, Project repetition ke liye hota hai. D galat hai: temporary chat privacy ke liye hai, jabke Farhan pehle hi naam hata chuka hai aur masla jawab ki sachai ka hai.

   Yaad rakhne wala rule: Source ke liye do hidayat: “only the text below + quote the sentence” aur “not in the source” likhne ki ijazat.

   Roman Urdu samajh (scenario aur question):

- Scenario: “Farhan ek drinks bottler mein quality officer hai. Usne supplier ke cap-liner certificate ka text chat mein paste kiya; pehle hi naam aur phone numbers hata diye the. Usne teen sawal puchhe: shelf life, test temperature aur storage humidity. AI ne teeno ke yaqeen se jawab diye, lekin certificate mein humidity ka zikr hi nahi, aur Farhan nahi jaanta kaun sa jawab text se aaya.”

- Question: “Prompt mein kaun si DO tabdeeliyan sab se munasib hain?”
- Key words: certificate = sanad/documentation, shelf life = cheez kitni der theek rehti hai, quote = hubahu jumla likhna, not in the source = “source mein nahi hai”, temporary chat = wo chat jo history mein save nahi hoti.

Exam trap aur 3 clues:

1. Deciding detail: “never mentions humidity” aur “cannot tell which answers came from the text”.
2. Question kya maang raha hai: “Which TWO”, yaani bilkul do sahi jawab chunne hain.
3. Trap: B (Project) aur D (temporary chat) kyun ke ye “achhe lagne wale” tools hain, lekin scenario ke masle se unka koi taluq nahi.

QUESTION 5 OF 13

Chapter section: Concept 6, ask for the deliverable and check that the caveats survive

Sana works at a subtitling studio and asked AI to compare three freelance translators’ rates. In the chat table, AI marked two rates “unverified”. She then asked for a one-page document for the studio owner, without any instruction about caveats, and the finished file shows a clean table with no marks. The owner will use the rates to choose a freelancer today. What is the most appropriate next step?

A. Count the caveats in both, restore the missing “unverified” marks, and ask to keep them next time.

B. Ask AI whether it dropped any marks and trust its answer.

C. Send the document, since the table matches the columns she asked for.

D. Rerun the whole job in a second assistant and send whichever document looks cleaner.

Correct Answer: Option A

Explanation (Roman Urdu): Sana ke chat mein do “unverified” marks the, aur document mein wo ghayab hain. Chapter kehta hai ke deliverables caveats kho dete hain, isi liye caveats gino aur jo kam hon unhe wapas daalo, aur agli baar “keep every unverified mark” likho. Owner aaj hi in rates par faisla karega, is liye marks ka hona zaroori hai. B galat hai: AI ke bayan par bharosa, jabke result khud dekhna chahiye. C galat hai: columns match hona caveats ka saboot nahi. D galat hai: doosra assistant bara aur be-maqsad hal hai.

Yaad rakhne wala rule: Chat se document banao to caveats gino. Kam hon to wapas daalo.

Roman Urdu samajh (scenario aur question):

- Scenario: “Sana subtitling studio mein kaam karti hai. Usne AI se teen freelance translators ke rates compare karwaye. Chat ke table mein AI ne do rates ‘unverified’

likhe. Phir usne owner ke liye ek page ka document maanga (caveats ka zikr kiye baghair), aur tayyar file mein saaf table hai, koi mark nahi. Owner aaj in rates se freelancer chunega."

- Question: "Sab se munasib agla qadam kya hai?"
- Key words: unverified = jis ki tasdeeq nahi hui, caveat = ehtiyat wali shart/nishani, deliverable = tayyar shuda cheez jo aage di jaye, restore = wapas lagana.

Exam trap aur 3 clues:

1. Deciding detail: chat mein 2 marks, document mein 0, aur aaj faisla hona hai.
2. Question kya maang raha hai: "next step", yaani pehle jo sab se zaroori aur chhota sahi kaam.
3. Trap: B (AI se puchna) kyun ke AI ka kehna "sentence" hai, saboot nahi; result khud dekho.

QUESTION 6 OF 13

Chapter section: Concept 7, plan-first and the draft-but-do-not-send boundary

Ali works in admissions at a language school. He has a spreadsheet of 40 applicants and wants AI to answer each one about fees and start dates. A few applicants asked about discounts he has not approved. The replies would go to the applicants' personal email addresses. Which request is most appropriate?

A. "Reply to all 40 and send them; I will check the sent folder later."

B. "Send replies to those asking only about dates, and draft the rest."

C. "Write each reply, choose the discounts you think fair, and send them."

D. "First list your steps and wait for my go. Draft only, do not send, and flag discount questions."

Correct Answer: Option D

Explanation (Roman Urdu): Bheji hui email wapas nahi hoti, aur discount ka faisla Ali ka hai. Chapter ke mutabiq pehle plan maango aur "go" ka intezar karwao, aur boundary likho: draft karo, send mat karo. D dono cheezein karta hai aur discount sawal Ali ke liye flag karwata hai. A galat hai: check baad mein, jabke email jaa chuki hogi. B aadhi sahi aadhi galat hai: plan ke baghair send kar dega. C galat hai: discount ka faisla AI ko de diya, jo Ali ne approve nahi kiya.

Yaad rakhne wala rule: Send karna wapas nahi hota. Plan pehle, draft karo magar send nahi, aur faisle apne paas.

Roman Urdu samajh (scenario aur question):

- Scenario: "Ali ek language school ki admissions mein kaam karta hai. Uske paas 40 applicants ki spreadsheet hai aur wo chahta hai AI har ek ko fees aur start dates ka

jawab de. Kuch ne aise discounts puchhe jo Ali ne approve nahi kiye. Jawab applicants ke personal email par jayenge."

- Question: "Kaun si request sab se munasib hai?"
- Key words: applicant = darkhwast dene wala, approve = manzoor karna, draft = kachcha mauda, flag = nishandehi karna, "wait for my go" = meri ijazat ka intezar karo.

Exam trap aur 3 clues:

1. Deciding detail: "personal email" (send wapas nahi hota) aur "discounts he has not approved" (faisla AI ka nahi).
2. Question kya maang raha hai: "Which request", yaani sahi hidayat ka jumla chunna.
3. Trap: B kyun ke "sirf dates wale bhejo" samajhdaar lagta hai, lekin plan aur ijazat ke baghair send ho jayega.

QUESTION 7 OF 13

Chapter section: Concept 8, Project: knowledge versus standing instructions

Rukhsana works at a welfare trust. For the third week in a row she pastes the same two-page grant policy into a new chat, types "mark anything you could not confirm as unverified", and asks for this week's donor report in the same table shape. The policy has not changed. She also has the assistant's memory switched on. How should she set this work up?

A. A Project with the policy as an instruction and the unverified rule as knowledge.

B. Rely on memory, since the assistant already knows her preferences.

C. A Project: policy as knowledge, the rule as a standing instruction, one chat per weekly job.

D. Keep pasting both each week so the text is always fresh.

Correct Answer: Option C

Explanation (Roman Urdu): Teen baar wohi background, wohi table, wohi rule aa raha hai, yaani ye kaam dohrata hai aur Project ka waqt aa gaya hai. Chapter ke mutabiq jo source badalta nahi wo knowledge mein jata hai aur jo rule hamesha lagta hai wo standing instruction mein, aur aaj ka kaam chat mein. A galat hai: dono cheezein ulti jagah rakh di (galat layer). B galat hai: memory assistant ki apni yaaddasht hai, ye kisi file ya rule ki jagah nahi leti. D galat hai: baar baar paste karna wohi masla hai jo Project hal karta hai.

Yaad rakhne wala rule: Source = Knowledge, Rule = Instruction, aaj ka kaam = Chat. Teesri dafa paste karo to Project.

Roman Urdu samajh (scenario aur question):

- Scenario: "Rukhsana ek welfare trust mein kaam karti hai. Lagatar teesre hafte wo wohi do page ki grant policy naye chat mein paste karti hai, likhti hai 'jo confirm na ho use

unverified mark karo', aur wohi table shape maangti hai. Policy badli nahi. Memory bhi on hai."

- Question: "Ye kaam kaise set kare?"
- Key words: standing instruction = wo rule jo har chat mein khud lagta hai, knowledge = wo files jo AI har chat mein padh sakta hai, memory = assistant ki apni yaaddasht, grant policy = imdaad ki policy.

Exam trap aur 3 clues:

1. Deciding detail: "third week", "same policy", "same table shape" (kaam wapas aata hai, background wohi, shape wohi).
2. Question kya maang raha hai: "How should she set this up", yaani sahi jagah par sahi cheez.
3. Trap: A (ulti layer) kyun ke naam wohi hain, bas jagah badal di gayi hai.

QUESTION 8 OF 13 SELECT TWO

Chapter section: Concept 8 (optional scheduled task) and the "ran is not the same as worked" caution

Nadia is a planning associate at a hotel and has a Project holding the occupancy policy as knowledge. She wants ChatGPT to run her weekly room-block brief automatically every Monday. She has run the brief by hand and trusts it. The first automatic result will go to the sales manager. Which TWO actions are most appropriate?

A. Rely on the Project's files, since the scheduled task will read them.

B. Paste the whole brief, including the source text, into the scheduled request.

C. Switch to a stronger model so the first automatic result needs no checking.

D. Trace one claim in the first automatic result to its source before relying on it.

Correct Answer: Option B and D

Explanation (Roman Urdu): Chapter ke mutabiq scheduled task Project ki files nahi dekhta, is liye poora brief aur source text request mein paste karna hai (B). Aur jo result khud-ba-khud aaye, us par bhi wohi check lagta hai: "job chali" ka matlab "kaam sahi hua" nahi, is liye ek claim ka source tak safar karo (D). A galat hai: Project files task ko nazar nahi aatin. C galat hai: stronger model checking ki jagah nahi leta.

Yaad rakhne wala rule: Schedule = poora brief paste karo. Pehla automatic result bhi check karo, "ran" is not "worked".

Roman Urdu samajh (scenario aur question):

- Scenario: "Nadia ek hotel mein planning associate hai. Uske Project mein occupancy policy knowledge ke taur par hai. Wo chahti hai ChatGPT har Monday uska weekly room-block brief khud chalaye. Wo brief haath se chala chuki hai aur us par bharosa karti hai. Pehla automatic result sales manager ko jayega."

- Question: “Kaun si DO kaarwaiyan sab se munasib hain?”
- Key words: scheduled task = waqt par khud chalne wala kaam, room block = hotel ke kamron ka group, trace = sirf source tak peecha karna, rely = bharosa karna.

Exam trap aur 3 clues:

1. Deciding detail: “scheduled”, “Project files” aur “first automatic result will go to the sales manager”.
2. Question kya maang raha hai: “Which TWO”, yaani do sahi, ek setup ke liye aur ek check ke liye.
3. Trap: A (Project files par bharosa) aur C (stronger model = no checking). Dono sunne mein samajhdaar lagte hain par chapter ke khilaf hain.

QUESTION 9 OF 13

Chapter section: Concept 9, the six Intervene moves (it answered a different question)

Bilal works in the sales office of a cement plant and asked AI: “Compare delivery costs for bulk versus bagged cement for three nearby districts.” AI wrote a persuasive sales pitch for bulk cement instead of a comparison. The costs inside the pitch look plausible. He must send the comparison to a dealer this afternoon. What is the most appropriate next step?

A. Stop it and restate the outcome in one line: a cost comparison, not a pitch.

B. Name each wrong cost in the pitch and ask AI to replace them one by one.

C. Switch to a stronger model and rerun the same message.

D. Take the job back and write the comparison himself.

Correct Answer: Option A

Explanation (Roman Urdu): AI ne ek mukhtalif sawal ka jawab diya (comparison ke bajaye pitch). Chapter ke table mein iska ilaaj hai: ruk jao aur outcome ek line mein dobara likho. Yahan ghalti poore kaam ki hai, kisi ek fact ki nahi. B galat hai: ek ek cost theek karna “correct” move hai, jabke masla sawal ka hai. C galat hai: machine ka level ghalat nahi tha, sawal ghalat samjha gaya. D galat hai: abhi job wapas lene ki zaroorat nahi, sab se chhota move kaafi hai.

Yaad rakhne wala rule: Jawab kisi aur sawal ka ho to ruko aur outcome ek line mein dobara likho.

Roman Urdu samajh (scenario aur question):

- Scenario: “Bilal cement plant ke sales office mein kaam karta hai. Usne AI se kaha teen qareebi districts ke liye bulk aur bagged cement ki delivery costs ka muqabla karo. AI ne muqabla likhne ke bajaye bulk cement ka qaail karne wala sales pitch likh diya. Pitch ki costs theek lagti hain. Bilal ko dopahar tak dealer ko comparison bhejna hai.”
- Question: “Sab se munasib agla qadam kya hai?”

- Key words: persuasive = qaail karne wala, pitch = bechne ki taqreer, plausible = mumkin/theek lagne wala, restate = dobara bayan karna.
  Exam trap aur 3 clues:

1. Deciding detail: “pitch instead of comparison”, yaani sawal hi ghalat samjha gaya.
2. Question kya maang raha hai: sab se chhota sahi move, chapter ke chhe moves mein se.
3. Trap: B kyun ke “costs theek lagti hain” sunke correct karna sahi lagta hai, aur C kyun ke stronger model aksar pehla khayal hota hai.
   QUESTION 10 OF 13 SELECT TWO
   Chapter section: Concept 9, the six Intervene moves (matching a symptom to a move)
   Imran is an education officer at a zoo. He keeps a list of problems from AI drafts of school-visit plans and wants to match each one to the right Intervene move. His laptop is also running low on battery. Which TWO changes match a signal to its fix?
   A. AI keeps failing a multi-step calculation even after switching to a stronger model, so he should write a longer prompt.
   B. One animal’s feeding time is wrong and everything else is right, so he should correct it by naming the error and what replaces it.
   C. On a free plan with no stronger model, a multi-step comparison fails, so he should make the job smaller and check one step at a time.
   D. The plan is drifting toward paid workshops but is not wrong yet, so he should restate the whole job from scratch.
   Correct Answer: Option B and C
   Explanation (Roman Urdu): B sahi hai kyun ke ek ghalat fact ke liye “correct” move hai: ghalti ka naam lo aur batao uski jagah kya aaye. C sahi hai kyun ke free plan par stronger model nahi, to “escalate” ka matlab hai kaam ko chhota karna aur ek ek step check karna. A galat hai: jab stronger model par bhi baar baar fail ho to chapter kehta hai kaam wapas le lo. D galat hai: abhi ghalat nahi, sirf rukh ghalat hai, is liye “redirect” lagta hai (sirf rukh batao), poora kaam dobara likhna zaroori nahi.
   Yaad rakhne wala rule: Ek fact ghalat = correct. Rukh ghalat = redirect. Level kam = escalate ya kaam chhota. Phir bhi fail = kaam wapas lo.
   Roman Urdu samajh (scenario aur question):

- Scenario: “Imran ek zoo mein education officer hai. Wo school-visit plans ke AI drafts ki masail ki list rakhta hai aur har masle ko sahi Intervene move se milana chahta hai. (Laptop ki battery kam hai, ye faltu baat hai.)”
- Question: “Kaun si DO jodiyan signal ko sahi fix se milati hain?”

- Key words: signal = nishani, fix = ilaaj, drifting = bhatakna, redirect = rukh badalna, escalate = darja badhana.

  Exam trap aur 3 clues:

1. Deciding detail: har option mein nishani (symptom) alag hai, wohi move tay karti hai.
2. Question kya maang raha hai: “Which TWO”, yaani sirf wo do jahan nishani aur move sahi mile.
3. Trap: A aur D. Dono mein sahi lagne wala move galat nishani se jora gaya hai.

   QUESTION 11 OF 13

   Chapter section: Concept 10, four things that never go out without a person; a pass earns similar jobs, never your name

   Tariq is an estimator at a carpentry workshop. AI drafted a kitchen-cabinet cost estimate, with a materials total and a labour total, from his saved brief. The same brief matched his own figures on last month’s job. The estimate goes to the client tomorrow morning, and the client will sign a contract based on it. Which action is most appropriate?

   A. Send it, since the same brief matched his figures last month.

   B. A named person reads it and traces the totals to their inputs before it goes.

   C. Send it tonight and check the totals if the client asks questions.

   D. Ask AI to confirm it checked the totals, then send.

   Correct Answer: Option B

   Explanation (Roman Urdu): Ye final client deliverable hai aur is mein financially ahem hisaab hai, aur chapter ke mutabiq aise kaam bheje jaane se pehle ek named insaan zaroor parhta hai, chahe pichla run saaf tha. Totals ko unke inputs tak trace karna chahiye. A galat hai: pichli dafa match hona AI ko mazeed kaam ka haq deta hai, aapka naam us par nahi lagta. C galat hai: check bhejne ke baad, jabke contract sign hone se pehle hona chahiye. D galat hai: “AI ne check kiya” sirf ek jumla hai, saboot nahi.

   Yaad rakhne wala rule: Client ke final kaam aur paison ke hisaab bhejne se pehle insaan parhe aur trace kare.

   Roman Urdu samajh (scenario aur question):

- Scenario: “Tariq ek carpentry workshop mein estimator hai. AI ne uske saved brief se kitchen cabinets ka cost estimate draft kiya, jis mein materials total aur labour total hain. Pichle mahine ke kaam par yehi brief uske apne figures se mila tha. Estimate kal subah client ko jayega aur client us par contract sign karega.”
- Question: “Sab se munasib kaarwai kaun si hai?”

- Key words: estimate = andaazi lagat ka hisaab, total = kul jama, trace = peecha karna, named person = jis ka naam tay ho.
  Exam trap aur 3 clues:

1. Deciding detail: “client will sign a contract” (paisa, nuksan wapas nahi) aur “final client deliverable”.
2. Question kya maang raha hai: “Which action”, yaani send karne se pehle kya karna.
3. Trap: A (pichla match) aur D (AI ne confirm kiya). Dono mein asli insani check missing hai.
   QUESTION 12 OF 13
   Chapter section: Concept 10, Reject in its second form: another round earns less, so raise the reviewer
   Zainab is a documentation clerk at a freight forwarder. AI assigns customs tariff codes to a shipment list. She has corrected the output three times, and each round fixes fewer errors while the remaining ones are subtle. For round three she already switched to a stronger model. The list must go to the customs authority on Friday. What is the most appropriate next step?
   A. Send a fourth, more detailed correction message.
   B. Take the job back to a person who knows customs classification.
   C. Turn on thinking and run the whole list again.
   D. Add a new Constraint line to the brief and rerun it.
   Correct Answer: Option B
   Explanation (Roman Urdu): Teen corrections ke baad har round kam theek kar raha hai, aur stronger model bhi try ho chuka. Chapter kehta hai ke ye kaam ke baare mein ishara hai, prompt ke baare mein nahi, aur agla move wo insaan hai jo is field ko jaanta ho. List customs authority ko jayegi, is liye bhi insani maahir zaroori hai. A galat hai: chauthi correction kam faida degi. C galat hai: machine ka level pehle hi barha chuki hain. D galat hai: Constraint line seekhi hui cheez ke liye hoti hai, jabke yahan reviewer ka darja badhana hai.
   Yaad rakhne wala rule: Teen corrections ke baad bhi fayda kam ho to prompt nahi, maahir insaan ko kaam do.
   Roman Urdu samajh (scenario aur question):

- Scenario: “Zainab ek freight forwarder mein documentation clerk hai. AI shipment list ko customs tariff codes deta hai. Wo teen baar correct kar chuki hai; har round pehle se kam ghaltiyan theek karta hai aur baqi ghaltiyan bareek hain. Teesre round ke liye wo pehle hi stronger model par ja chuki hai. List Friday ko customs authority ko jani hai.”
- Question: “Sab se munasib agla qadam kya hai?”

- Key words: tariff code = custom mahsool ka code, classification = qism/darja bandi, diminishing = kam hota hua, authority = ikhtiyar wala idara.
  Exam trap aur 3 clues:

1. Deciding detail: “three times”, “fixes fewer errors”, “already switched to a stronger model”.
2. Question kya maang raha hai: agla qadam jab baqi sab kuch aazmaya ja chuka ho.
3. Trap: C aur D, kyun ke “thinking on karo” aur “Constraint likho” dono achhe moves hain, lekin aaj ke halaat mein kaafi nahi.
   QUESTION 13 OF 13
   Chapter section: Concept 11, same job in a different AI; record observations, not a ranking
   Mariam is an acquisitions assistant at a municipal library. She ran her saved six-line brief in a second free assistant. It finished without any rewrite, honoured the Authority line, and two prices in its table differ from the first run. She has already traced one claim in the second result. Her manager now asks which assistant is better. Which action is most appropriate?
   A. Write that the second assistant is better, because it finished without a rewrite.
   B. Rewrite the brief so that it matches the second assistant’s buttons.
   C. Skip checking the second result, since the first one was already verified.
   D. Record what each run did, as observations, without calling either assistant better.
   Correct Answer: Option D
   Explanation (Roman Urdu): Chapter kehta hai ke jo likha jata hai wo ek din ke do runs ka record hai, rankings nahi, kyun ke models bohat tezi se badalte hain. Mariam ko dono runs ki observations likhni chahiye (finish hua, kitne messages, Authority maani, unverified marks, deliverable). A galat hai: ek din ki baat par “behtar” ka faisla. B galat hai: brief buttons ke baghair, kaam ko bayan karta hai, isliye rewrite ki zaroorat nahi. C galat hai: dusre result ko bhi usi tareeqe se verify karna hota hai, aur scenario mein wo already ho chuka hai, jabke ye option usay chhorna keh raha hai.
   Yaad rakhne wala rule: Do assistants ka muqabla observation hai, rankings nahi.
   Roman Urdu samajh (scenario aur question):

- Scenario: “Mariam ek municipal library mein acquisitions assistant hai. Usne apna saved six-line brief doosre free assistant mein chalaya. Kaam bina rewrite ke mukammal hua, Authority line maani gayi, aur table ki do qeematein pehle run se mukhtalif hain. Wo dusre result ka ek claim pehle hi trace kar chuki hai. Manager poochta hai kaun sa assistant behtar hai.”
- Question: “Sab se munasib kaarwai kaun si hai?”

- Key words: acquisitions = kitabon/maal ki kharidari, honoured = izzat di/maana, observation = mushahida, ranking = darja bandi, verdict = faisla.
  Exam trap aur 3 clues:

1. Deciding detail: “which assistant is better” aur “already traced one claim”.
2. Question kya maang raha hai: sahi tareeqa se record karna.
3. Trap: A (jaldi faisla) kyun ke manager ka sawal sunke jawab dena aasan lagta hai, lekin chapter ranking se mana karta hai.
   SUMMARY TABLE

Q	Chapter section tested	Type
1	Concept 2: outcome, not clicks	Single
2	Concept 3: Brief, Authority line	Single
3	Concept 4: searched versus remembered, citation is not verification	Single
4	Concept 5: source, “not in the source”	Select two
5	Concept 6: deliverable, caveats survive	Single
6	Concept 7: plan-first, draft but do not send	Single
7	Concept 8: Project, knowledge versus instructions	Single
8	Concept 8 optional + Concept 10: schedule, “ran is not worked”	Select two
9	Concept 9: restate the outcome	Single
10	Concept 9: matching six Intervene moves	Select two
11	Concept 10: four things never go out without a person	Single
12	Concept 10: Reject, second form	Single
13	Concept 11: observations not ranking	Single

Questions where the chapter was thin or I am not fully sure (please verify):

- Q8: “A scheduled task does not see your Project’s files” is stated for ChatGPT only, in the optional box in Concept 8. The “check the first automatic result” part comes from the same box.
- Q7: The chapter does not say outright that memory is not a substitute for a Project. It says memory exists and should be reviewed. I used the knowledge-versus-instructions rule from Concept 8 as the deciding point.

- Q12: The chapter gives the “another round earns less, go to a person who knows the field” rule. The detail that she already tried a stronger model is mine, added so that option C is clearly wrong.
- Q10: Option D is wrong because the chapter’s redirect move says “name the direction, not the whole job again”. I used that line.
- Q13: The Concept 11 text says “record what happened rather than which was better”. I made the extra “already traced one claim” detail myself.

  Exam mein kisi bhi question ko pehchanne ka tareeqa (3 roles, har question mein):

1. Deciding detail: scenario mein wo ek ya do cheezein dhoondo jo jawab tay karti hain (stakes, wapas hone wala ya nahi, kis ne check kiya, kya pehle se maujood hai). Baqi details faltu hoti hain.
2. Question ka kaam: aakhri jumla dekho, wo “next step”, “pattern aur fix”, “which TWO” ya “which request” mein se kya maang raha hai. Select-two mein bilkul do jawab chahiye.
3. Trap: galat options hamesha aadha-sahi hote hain. Common jaal: fix zaroorat se bara (stronger model, naya chat), galat layer (rule knowledge mein), sahi kaam galat waqt par (send ke baad check), AI ke apne bayan par bharosa, aur sahi diagnosis ke saath galat fix.

   Sahi jawab chunne ka tareeqa: pehle deciding detail se chapter ka rule yaad karo, phir har option ko poochho “kya ye is detail se match karta hai, aur kya ye sab se chhota sahi qadam hai?” Jo option dono mein pass ho wohi jawab hai.
