AI Fluency Practice Set: 13 Questions

Note: This chapter has no Project, Skill or Memory framework (those belong to other chapters), so I did not use them. I used only the 4Ds, the three modes, the numbers rule, the grounding prompt, the review endings and the diligence checks. The chapter was rich enough for all 13 questions.

QUESTION 1 OF 13
Chapter section: Three ways to work with AI (Agency: “future” and “for others”)

A hostel bookings associate in Lahore sets up an AI assistant on Monday. It will answer routine room enquiries overnight and flag unusual requests for the morning staff. It must ask a manager before promising any refund. The associate will be asleep while it works, and guests, not she, will read its replies. Which mode of working is this, and why is it the hardest of the three?

A. Automation, because the replies are routine, so the main risk is one step being done badly.
B. Augmentation, because she and the AI refine each reply together, so she sees every decision.
C. Agency, because it acts later for other people, so judgment must be built in beforehand.
D. Automation, because she wrote the rules, so no further boundaries or escalation are needed.

Correct Answer: Option C

Explanation (Roman Urdu): Is scenario mein AI raat ko, jab associate so rahi hai, kaam karta hai aur jin logon se baat karta hai (guests) wo associate khud nahi hain. Chapter ke mutabiq yahi “future” aur “for others” agency ki pehchan hain, aur isi liye judgment pehle se andar daalni parti hai. Option A galat hai kyunke automation mein AI sirf ek diya hua task karta hai, jabke yahan AI khud decide karta hai ke kya routine hai. Option B galat hai kyunke augmentation mein insaan sath baith kar kaam karta hai, aur yahan wo maujood hi nahi. Option D galat hai kyunke rules likhne ke baad bhi boundaries aur escalation zaroori hain (refund se pehle manager).

Yaad rakhne wala rule: Jab insaan kamre mein na ho aur jawab doosron ko jaye, to wo Agency hai.

Roman Urdu samajh (word by word):

- *Scenario:*

    - “A hostel bookings associate in Lahore sets up an AI assistant on Monday” = Lahore ke hostel ki bookings wali ek staff ne Monday ko AI assistant set kiya.
    - “It will answer routine room enquiries overnight” = ye raat bhar aam (routine) room ke sawalon ke jawab dega.
    - “flag unusual requests for the morning staff” = ghair-mamooli requests par nishan laga dega taake subah ka staff dekhe.
    - “must ask a manager before promising any refund” = refund ka wada karne se pehle manager se poochna lazmi hai.
    - “She will be asleep… guests, not she, will read its replies” = wo so rahi hogi, aur jawab guests parhenge, wo nahi.
- *Mushkil lafz:* routine = rozmarra ka, aam. flag = nishan lagana. refund = paise wapas. mode = tareeqa.
- *Question line:* “Which mode… and why is it the hardest?” = ye kaun sa tareeqa hai aur teeno mein sab se mushkil kyun hai?
- Exam trap: “routine replies” dekh kar Automation chun lena. Deciding detail ye hai ke wo so rahi hai (future) aur reader koi aur hai (for others).

QUESTION 2 OF 13
Chapter section: Delegation, Problem awareness (Mistake 1: prompting before defining the problem)

A carpentry estimator wants an AI agent to prepare quotes for kitchen-cabinet jobs. She types “Build me a quoting agent” and receives a long, confident design. She has not yet decided which jobs it may quote, the job value above which she must approve, or whether it may send quotes or only draft them. Her shop has a few repeat customers and a two-day quote turnaround. What is the most appropriate next step?

A. Decide the jobs, the approval value and the draft-or-send rule herself before prompting again.
B. Ask the AI to guess sensible approval limits and sending rules, then edit whatever it proposes.
C. Add a longer prompt describing the tone and layout of the quotes in careful detail.
D. Switch to a stronger reasoning model so that the design comes back with better questions.

Correct Answer: Option A

Explanation (Roman Urdu): Chapter kehta hai ke ye “business questions” hain (kaun se jobs, kitni value par approval, send ya sirf draft), aur AI business policy tab tak decide nahi kar sakta jab tak aap use ye authority na dein, aur aksar nahi deni chahiye. Is liye pehle khud faisla karna sahi hai, phir prompt karna. Option B galat hai kyunke policy ka faisla AI ko de diya gaya, jo insaan ka kaam hai. Option C galat hai kyunke tone aur

layout ka masla nahi hai, asal gap faislon ka hai (symptom ka ilaaj). Option D galat hai kyunke bara model bhi aap ki business policy nahi jaanta, ye zarurat se bara fix hai.

Yaad rakhne wala rule: Prompt se pehle goal, limits aur approval ke faisle insaan karta hai.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "A carpentry estimator" = barhai (carpentry) ke kaam ka andaza (estimate) lagane wali.
  - "wants an AI agent to prepare quotes for kitchen-cabinet jobs" = chahti hai ke AI agent kitchen cabinet ke kaam ke quotes (qeemat ke bhaao) tayyar kare.
  - "Build me a quoting agent" = mere liye quote banane wala agent bana do (bohat mubham, vague).
  - "She has not yet decided which jobs… approval value… send or only draft" = usne abhi tak tay nahi kiya ke kaun se jobs, kitni value par apni manzoori, aur bhejna hai ya sirf draft banana hai.
  - "repeat customers", "two-day turnaround" = purane gahak aur 2 din mein quote dena. Ye extra detail hai.
- *Mushkil lafz:* approval = manzoori. draft = kacha masauda. confident = pur-aitemaad. stronger reasoning model = zyada taqatwar soch wala model.
- *Question line:* "most appropriate next step" = ab agla sab se munasib qadam kya hai?
- Exam trap: "Bara model lagao" ya "lamba prompt likho" jaisa bara fix. Masla prompt ka nahi, faislon ka hai.

QUESTION 3 OF 13
Chapter section: Process description (split by order, put the riskiest step first, check before continuing)

A procurement associate at a drinks bottler pastes three bottle-cap supplier proposals and her scoring criteria into one prompt and asks for a recommendation. The answer recommends Supplier B, but it cites a unit price that appears nowhere in B's proposal. The order is worth Rs 4 million and goes to the plant manager on Friday. Which change is most appropriate?

A. Add "be accurate and double-check your numbers" to the same one-pass prompt.
B. Ask the AI to review its own recommendation and report any mistakes it finds.
C. Ask for three versions of the recommendation and keep the most consistent one.
D. Split it into steps: extract prices to a table, check it, then compare and draft.

Correct Answer: Option D

Explanation (Roman Urdu): Jab AI ek hi baar mein extract, compare, score aur likh deta hai to aap sirf aakhri nateeja check kar sakte hain. Chapter ka hal hai kaam ko tarteeb se tordna: pehle facts ka table (kyunke wahan ghalti sab se door tak phailti hai), table ko source se check karna, phir agla step. Option A galat hai kyunke "be accurate" likhne se process nahi badalta, aur masla wahi rehta hai. Option B galat hai kyunke check AI khud kar raha hai aur ghalat price ab bhi nazar nahi aayegi (kamzor check). Option C galat hai kyunke teen versions mein bhi wahi ghalat price ho sakti hai, ye symptom ka ilaaj hai.

Yaad rakhne wala rule: Ek step, ek request, aur agle step se pehle check. Jahan ghalti sab se zyada phailti hai wo pehle.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "procurement associate" = kharidari (khareed) ka staff.
  - "pastes three… proposals and her scoring criteria into one prompt" = teen suppliers ke proposals aur apne number dene ke usool, sab ek hi prompt mein daal diye.
  - "recommends Supplier B, but it cites a unit price that appears nowhere" = Supplier B ko chunta hai, lekin aisi price likhta hai jo proposal mein kahin nahi.
  - "Rs 4 million", "Friday" = 40 lakh ka order, Jumma ko plant manager ke paas jayega. Stakes bari hain.
- *Mushkil lafz:* cites = hawala deta hai. unit price = ek cheez ki qeemat. extract = nikalna. consistent = ek jaisa.
- *Question line:* "Which change is most appropriate?" = kaun si tabdeeli sab se munasib hai?
- Exam trap: "AI se khud check karwao" (B). Check ka tareeqa kamzor hota hai jab check karne wala wahi hai jis ne ghalti ki.

QUESTION 4 OF 13
Chapter section: Discernment, signs of a made-up answer (a claimed action that never happened)

A zoo education officer asks a newly adopted AI tool to email a school-visit reminder to 40 teachers. The tool replies, "I have sent the email to all 40 teachers." The visit is tomorrow morning, and no sent message, log or confirmation appears anywhere on screen. What is the most appropriate next step?

A. Ask the AI “are you sure?” and accept a repeated yes as confirmation.
B. Check the sent folder or the tool’s log to see whether the emails really went out.
C. Send the reminder again by hand straight away, to make sure it arrives.
D. Rewrite the prompt telling the tool to be more honest about the actions it takes.

Correct Answer: Option B

Explanation (Roman Urdu): Chapter ke mutabiq “I have sent the email” tab tak sirf ek jumla hai jab tak tool sent message, log ya test result na dikhaye. Is liye asal saboot (sent folder ya log) dekhna sahi hai. Option A galat hai kyunke wahi source dobara “haan” kahe to wo naya saboot nahi, kamzor check hai. Option C galat hai kyunke bina verify kiye dobara bhejna teachers ko duplicate emails de sakta hai aur masle ki jarr nahi dekhta. Option D galat hai kyunke prompt badalna check ka badal nahi, aur AI ka confident tone phir bhi wahi rahega.

Yaad rakhne wala rule: AI ka “maine kar diya” ek jumla hai, saboot nahi. Saboot tool se dekho.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “education officer” = chiriya ghar (zoo) mein taleem ka afsar.
  - “newly adopted AI tool” = naya apnaya hua tool (extra detail).
  - “email a school-visit reminder to 40 teachers” = 40 ustadon ko school visit ki yaad-dehani email.
  - “I have sent the email” = maine email bhej di hai.
  - “no sent message, log or confirmation appears” = koi bheji hui email, record ya tasdeeq nazar nahi aati.
  - “visit is tomorrow morning” = visit kal subah hai, waqt kam hai.
- *Mushkil lafz:* reminder = yaad-dehani. log = record ki list. confirmation = tasdeeq. honest = sachcha.
- *Question line:* “most appropriate next step” = agla munasib qadam?
- Exam trap: “Dobara bhej do, to be safe” (C) achha lagta hai, lekin pehle verify karna hai, andhe dobara bhejna nahi.

QUESTION 5 OF 13 — SELECT TWO
Chapter section: Product discernment, grounding the answer in the documents you supply

A buyer at a pharmacy chain has three distributor proposals attached and wants to know which one allows early exit from the contract. Earlier, the AI answered with an exit clause that one distributor’s proposal does not contain. She must report to her director this afternoon. Which TWO changes to the prompt are most appropriate?

A. Tell the AI to act as a senior contracts lawyer so that it answers more reliably.
B. Limit it to the three proposals and let it say “not stated” when exit terms are missing.
C. Require the section heading and the source sentence for every term it reports.
D. Ask for three alternative answers and use the one that appears most often.

Correct Answer: Option B and C

Explanation (Roman Urdu): Chapter ka grounding prompt teen cheezein karta hai: sirf attached documents se jawab do, “proposal mein nahi likha” kehne ki ijazat do, aur har term ke liye heading aur jumla quote karo taake aap ek minute mein check kar sakein. Option B pehle do hissay cover karta hai aur Option C teesra, is liye dono sahi hain. Option A galat hai kyunke role dene se model ka gap bharna (training se guess karna) nahi rukta. Option D galat hai kyunke teen jawab agar teeno mein wohi imaginary clause ho to “sab se zyada aane wala” bhi ghalat hi hoga.

Yaad rakhne wala rule: Sirf documents se, “not stated” ki ijazat, aur har baat ka source jumla.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “pharmacy chain” = dawakhanon ka silsila.
  - “three distributor proposals attached” = teen distributors (supply karne walon) ke proposals lage hue hain.
  - “early exit from the contract” = muahide se waqt se pehle nikalna.
  - “answered with an exit clause that… does not contain” = aisi shart bata di jo us proposal mein hai hi nahi.
  - “report to her director this afternoon” = aaj dopahar director ko report deni hai.
- *Mushkil lafz:* clause = muahide ki shart. attached = sath lagi hui. reliably = bharose ke sath. alternative = badal.
- *Question line:* “Which TWO changes to the prompt” = prompt mein kaun si DO tabdeeliyan?
- Exam trap: “Expert ka role do” (A) bohat common jaal hai. Role grounding nahi hota.

QUESTION 6 OF 13
Chapter section: Feedback pattern (Problem → Why it matters → Direction)

A subtitling studio project lead asks an AI to draft a note to freelance translators about a new deadline policy. The draft assumes the translators are salaried staff with fixed

hours, but they are freelancers paid per film. She needs a corrected draft within the hour. Which request is most appropriate?

A. Say the draft is wrong and ask the AI to try again with a fresh approach.
B. Ask for a full restart from a blank page with a shorter, simpler tone.
C. Say it assumes salaried staff, why that hurts, and ask for a freelancer version.
D. Switch to a more powerful model and resend the identical original prompt.

Correct Answer: Option C

Explanation (Roman Urdu): Chapter ka feedback pattern hai: Problem, phir "kyun matter karta hai", phir Direction. Option C mein teeno hain: draft salaried maanta hai (problem), ye translators ko ghalat lagega (kyun), freelancer wala version likho (direction). Option A "wrong, try again" jaisa kamzor feedback hai, isme ye batata hi nahi ke kya theek karna hai. Option B zarurat se bara fix hai, kyunke sirf ek assumption ghalat tha, poora draft nahi. Option D symptom ka ilaaj hai, kyunke wohi prompt dobara bhejne se wohi ghalat assumption wapas aa sakti hai.

Yaad rakhne wala rule: Feedback = kya ghalat, kyun ghalat, ab kya karo.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "subtitling studio" = filmon ke subtitles banane wala studio.
  - "freelance translators" = azad (contract par) tarjuma karne wale.
  - "assumes the translators are salaried staff with fixed hours" = maan leta hai ke wo tankhwah wale staff hain jin ke ghante tay hain.
  - "freelancers paid per film" = hakikat mein wo har film ke hisaab se paise lete hain.
  - "within the hour" = ek ghante ke andar chahiye.
- *Mushkil lafz:* salaried = tankhwah wala. policy = usool/pabandi. fresh approach = naya tareeqa. identical = bilkul ek jaisa.
- *Question line:* "Which request is most appropriate?" = kaun si guzarish sab se munasib hai?
- Exam trap: Chhota sa masla ho aur option "poora dobara likho" ya "bara model lagao" de, to wo bara fix hai. Sab se chhota kaafi fix chuno.

QUESTION 7 OF 13
Chapter section: Three review endings (ready to use / needs revision / needs human override)

A hotel planning associate asks an AI to draft the refund-percentage clause for a wedding group contract. She cannot confirm that the percentages match the hotel's

rate policy, which is held by the revenue manager. The clause binds the hotel and goes to the client tomorrow. The wording reads smoothly and professionally. What is the most appropriate next step?

A. Mark it for human override and have the revenue manager confirm the figures before it goes.
B. Mark it ready to use, since the wording is polished and the AI usually follows policy.
C. Send it back with feedback asking the AI to double-check the percentages itself.
D. Send it to the client now, adding a note that the figures are still a draft.

Correct Answer: Option A

Explanation (Roman Urdu): Chapter kehta hai har review teen mein se ek anjaam par khatam hota hai: ready, revision, ya human override. Yahan figures verify nahi hue, clause hotel ko bind karta hai, aur policy ka malik revenue manager hai, is liye human override sahi hai. Option B galat hai kyunke polished likhai durusti ka saboot nahi (confidence aur correctness alag hain). Option C galat hai kyunke AI ke paas hotel ki rate policy hai hi nahi, to khud check karna kamzor check hai. Option D galat hai kyunke ghalat binding clause client tak chala gaya to wapas lena mushkil hai, yani check bohat der se.

Yaad rakhne wala rule: Unverified aur high-stakes draft ka anjaam “human override” hai.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “hotel planning associate” = hotel mein events ki planning karne wali.
  - “refund-percentage clause for a wedding group contract” = shadi ke group ke muahide mein paise wapas karne ke percentage ki shart.
  - “cannot confirm the percentages match the rate policy” = tasdeeq nahi kar sakti ke percentage hotel ki rate policy se milte hain.
  - “binds the hotel” = hotel ko pabandi mein kar deta hai (legal zimmedari).
  - “reads smoothly and professionally” = parhne mein saaf aur pesha-warana lagta hai (ye jaal hai).
- *Mushkil lafz:* override = faisla insaan ke haath mein lena. revenue manager = aamdani/rates ka zimmedar. bind = pabandi.
- *Question line:* “most appropriate next step” = agla munasib qadam.
- Exam trap: Sab se zyada sahi lagne wala jaal “polished hai to ready hai” (B).

QUESTION 8 OF 13
Chapter section: Process discernment (is working this way paying off?)

A sales-office coordinator at a cement plant has Claude draft the weekly price notice. Each week the table comes out in the wrong format, and she spends about 25 minutes fixing it. She has timed it: writing the notice herself takes about 20 minutes. She has corrected the same formatting problem in the last four chats. What is the most appropriate next step?

A. Keep going, because editing a draft feels more productive than starting from a blank page.
B. Open a fresh chat each week in case the formatting problem clears by itself.
C. Ask for three drafts each week and edit whichever one looks closest to right.
D. Treat it as a net loss: set the format rule up front, or write it herself.

Correct Answer: Option D

Explanation (Roman Urdu): Chapter kehta hai ke steering (sudhaarne) mein 20 minute laga kar 15 bachana loss hai jise log “productive laga” keh kar win ginte hain. Yahan 25 minute lag rahe hain aur khud likhne mein 20, to ye net loss hai. Chapter ke teen escalate hone wale qadam hain: performance description badlo, tool badlo, ya task wapas le lo, aur yahan pehla qadam format rule shuru mein likhna hai. Option A galat hai kyunke wo wohi “feels productive” wali ghalti hai. Option B galat hai kyunke naya chat wohi masla dohrata hai, aur rule kahin likha hi nahi gaya. Option C galat hai kyunke teen drafts mein bhi format ka wohi masla rahega.

Yaad rakhne wala rule: Agar edit karne mein khud likhne se zyada waqt lage, to wo loss hai.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “cement plant” = cement banane ka karkhana.
  - “weekly price notice” = haftawar qeemton ka notice.
  - “the table comes out in the wrong format” = table ghalat format mein aati hai.
  - “25 minutes fixing it… writing herself takes 20” = theek karne mein 25 minute, khud likhne mein 20 minute.
  - “same formatting problem in the last four chats” = pichle 4 chats mein wohi masla theek kiya.
- *Mushkil lafz:* net loss = kul mila kar nuqsaan. productive = kaam ka lagna. steering = rukh theek karte rehna.
- *Question line:* “most appropriate next step” = agla munasib qadam.
- Exam trap: Numbers (25 vs 20) hi deciding detail hain. Mehnat ka ehsaas aap ko dhoka de raha hai.

QUESTION 9 OF 13
Chapter section: Creation diligence (redaction fails in two directions)

A caseworker at a welfare trust uses an approved AI tool to draft a monthly summary from her case notes. She deleted all names and ID numbers, but kept the line “the only widow in Ward 4 who received the January flood grant.” The trustees need to see the pattern of grant types and outcomes. What is the most appropriate next step?

A. Paste it as it stands, because the names and IDs are gone and the tool is approved.
B. Remove or generalise the details that still single someone out, keeping the pattern.
C. Delete every detail, including grant types and outcomes, to be completely safe.
D. Paste the original notes, since an approved tool already protects the data anyway.

Correct Answer: Option B

Explanation (Roman Urdu): Chapter ka test hai: kya sirf paste kiya hua text parh kar koi pehchan sakta hai ke baat kis ke baare mein hai? “Ward 4 ki akeli widow” nam jitni hi saaf pehchan hai, is liye aise details hatana ya aam karna chahiye, lekin grant types aur outcomes (task ki zarurat) rakhne chahiye. Option A galat hai kyunke bohat kam hataya gaya, combination phir bhi ek insaan ki taraf ishara karta hai. Option C galat hai kyunke bohat zyada hata diya, ab summary ka kaam hi nahi ho sakta. Option D galat hai kyunke tool approved hona redaction ki zarurat khatam nahi karta.

Yaad rakhne wala rule: Redaction mein na bohat kam hatao na bohat zyada: pehchan hatao, pattern rakho.

Roman Urdu samajh (word by word):

- *Scenario:*
  - “welfare trust” = fallahi (bhalai ka) idara.
  - “approved AI tool” = idare se manzoor-shuda tool.
  - “case notes” = har kes ke baare mein likhe hue notes.
  - “deleted all names and ID numbers, but kept…” = nam aur ID hata diye, lekin ye jumla rakh liya.
  - “the pattern of grant types and outcomes” = grants ki qismon aur nateejon ka rujhan.
- *Mushkil lafz:* redaction = pehchan wale hisse hatana. generalise = aam kar dena (jaise “ek ilaqay ki ek khatoon”). single out = akela pehchan lena.
- *Question line:* “most appropriate next step” = agla munasib qadam.
- Exam trap: “Names hata diye to safe” (A). Combination of details bhi pehchan ban jaata hai.

QUESTION 10 OF 13
Chapter section: The numbers rule (compute, never generate)

A restaurant manager asks Claude to summarise the month's sales from a pasted report. Every line item in the summary matches the report, but the total at the bottom is Rs 38,000 below what the till system shows. The figures go into tomorrow's owners' meeting. What is the most appropriate next step?

A. Get the total from a spreadsheet or code that Claude runs and shows, then check it used the right rows.
B. Ask Claude to summarise again and see whether the total changes.
C. Add "double-check your arithmetic" to the prompt and accept the new total.
D. Compare only the final total with the till figure and stop if they match.

Correct Answer: Option A

Explanation (Roman Urdu): Chapter kehta hai ke jis number par faisla tika ho wo compute hona chahiye, generate nahi. AI total ko "likely lagne wala" andaza bana deta hai, is liye line items sahi hone par bhi total ghalat ho sakta hai. Sahi tareeqa spreadsheet ya code se total nikalna aur phir inputs check karna hai (sahi rows aur sahi rate use hui?). Option B galat hai kyunke dobara andaza lagana computation nahi. Option C galat hai kyunke sirf kehne se AI calculator nahi ban jaata. Option D adha sahi hai, lekin sirf sum match karna kaafi nahi, kyunke chapter inputs check karne ko kehta hai.

Yaad rakhne wala rule: Zaroori number code ya spreadsheet se nikalo, aur sum se pehle inputs dekho.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "summarise the month's sales from a pasted report" = paste ki hui report se mahine ki sales ka khulasa.
  - "every line item matches" = har ek entry sahi hai.
  - "total… Rs 38,000 below the till system" = kul jama till system se 38,000 kam hai.
  - "owners' meeting" = maalikon ki meeting, figures wahan jayenge.
- *Mushkil lafz:* line item = ek alag entry. total = kul jama. till = gallay ka hisaab. arithmetic = hisaab kitaab.
- *Question line:* "most appropriate next step" = agla munasib qadam.
- Exam trap: Option D half-right hai ("total match kar lo"), magar chapter inputs check karne ko kehta hai.

QUESTION 11 OF 13 — SELECT TWO
Chapter section: Deployment diligence (check depth grows with reach and irreversibility)

A billing associate at a city utility used AI help on three things today: a private summary of this morning's meeting, a batch of 300 supplier payments to release tonight, and a compliance report due to the regulator on Friday. She has time for one review pass on each. Which TWO review plans are most appropriate?

A. Give the private meeting summary a quick glance, since only she reads it and it is easy to redo.
B. Read the payment batch after tonight's release, because the bank sends confirmations.
C. Have a second person review the regulator report before it is submitted.
D. Give all three the same quick read, since AI drafts are similar in reliability.

Correct Answer: Option A and C

Explanation (Roman Urdu): Chapter ke mutabiq jitne zyada log result tak pohanchein aur jitna kaam wapas na ho sake, utni gehri check chahiye: apne liye note ko sirf ek nazar, regulator ki report ko doosra reviewer. Isi liye A aur C sahi hain. Option B galat hai kyunke payment ka check release se PEHLE hona chahiye, kyunke baad mein koi reviewer nahi hota (right action, wrong time). Option D galat hai kyunke teeno ko ek jaisa dekhna stakes ka farq nazar-andaaz karta hai.

Yaad rakhne wala rule: Jitna bara reach aur jitna na-wapas-hone wala kaam, utni gehri check, aur check act se pehle.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "city utility" = shehar ka sarkari khidmat idara (bijli, pani).
  - "private summary of this morning's meeting" = aaj subah ki meeting ka apna zaati khulasa.
  - "batch of 300 supplier payments to release tonight" = aaj raat jaari honay wali 300 supplier payments.
  - "compliance report due to the regulator" = nigraan idare ko deni wali qanooni taameel ki report.
  - "time for one review pass on each" = har cheez ke liye ek baar dekhne ka waqt.
- *Mushkil lafz:* irreversible = jo wapas na ho sake. regulator = nigraan idara. batch = ek saath ka gucha.
- *Question line:* "Which TWO" = kaun se DO.
- Exam trap: Select-two mein ek ghalat option (B) isliye sahi lagta hai ke "bank confirmation bhejta hai". Magar wo saboot baad ka hai.

QUESTION 12 OF 13
Chapter section: Performance discernment (is the AI serving people well when you are not watching?)

A language school's admissions team deploys an AI tutor for exam preparation. Reviewers check 50 answers and find all of them factually correct. Usage logs show that students ask a question, hesitate, and the tutor immediately gives the full solution; scores have not improved. Which pattern is this, and what is the fix?

A. A product discernment problem; fact-check each answer more deeply.
B. A diligence problem; add a notice telling students that they are using AI.
C. A performance problem across many cases; add a rule against giving the answer before an attempt.
D. A process discernment problem; switch the school to a more capable model.

Correct Answer: Option C

Explanation (Roman Urdu): Chapter ki misaal bilkul yahi hai: AI tutor har jawab sahi de sakta hai phir bhi bura tutor ho sakta hai, kyunke wo hesitate karte hi solution de deta hai aur koi seekhta nahi. Ye performance discernment hai, aur ye ek chat mein nahi, bohat saare cases (logs) mein nazar aata hai. Fix performance description mein rule likhna hai (pehle student koshish kare). Option A galat hai kyunke jawab to sahi hain, masla unka asar hai. Option B galat hai kyunke disclosure alag cheez hai, aur isse scores par asar nahi parta. Option D galat hai kyunke process discernment ek session ke andar kaam karne ke tareeqe ke baare mein hai, aur bara model is behaviour ko nahi badalta.

Yaad rakhne wala rule: Jawab sahi ho phir bhi logon ko faida na ho, to wo performance discernment hai.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "language school admissions team" = zubaan sikhane wale school ka dakhla (admission) team.
  - "AI tutor for exam preparation" = imtihan ki tayyari ke liye AI ustaad.
  - "all factually correct" = sab jawab haqeeqat mein durust.
  - "usage logs show… hesitate… full solution" = istemal ke record dikhate hain ke student ruk jaye to AI poora hal de deta hai.
  - "scores have not improved" = number behtar nahi hue.
- *Mushkil lafz:* deploy = logon ke istemal ke liye laga dena. hesitate = jhijhakna. logs = record.

- *Question line:* "Which pattern is this, and what is the fix?" = ye kaun sa pattern hai aur hal kya hai?
- Exam trap: "Jawab sahi hain" dekh kar product discernment ya "aur check karo" (A). Asal sawal asar ka hai.

QUESTION 13 OF 13 — SELECT TWO
Chapter section: Bookkeeping Digital FTE example (testing against trusted history, reviewing apparent successes)

An ice rink operations associate is testing an AI agent that matches monthly payments to booking records. The agent matched the demo month perfectly, so the manager wants to switch it on for all months. Two accountants hold last year's reconciliations, which the rink already trusts. Which TWO steps are most appropriate before relying on it?

A. Sign off now, since the demo month matched perfectly.
B. Run it on the trusted past reconciliations and count the wrong matches that slip through.
C. Review only the items the agent flagged as unmatched.
D. Have an accountant also review some matches that look successful, not only failures.

Correct Answer: Option B and D

Explanation (Roman Urdu): Chapter mein Ayesha demo par bharosa nahi karti; wo purani, bharose-mand reconciliations par test karti hai aur ghalat matches gintey hain jo nikal jaate hain. Saath hi accountant un matches ko bhi dekhta hai jo kamyab lagte hain, kyunke system sirf khamoshi se fail ho kar bhi safe lag sakta hai. Isi liye B aur D sahi hain. Option A galat hai kyunke demo sab se kamzor saboot hai (ek run, chuna hua case). Option C galat hai kyunke sirf flagged items dekhne se wo ghalat matches nazar nahi aate jo kamyab dikh rahe hain.

Yaad rakhne wala rule: Demo kaafi nahi: purane bharose-mand data par test karo aur kamyab-dikhne wale results bhi dekho.

Roman Urdu samajh (word by word):

- *Scenario:*
  - "ice rink operations associate" = barf par skating ke rink ke operations ki staff.
  - "matches monthly payments to booking records" = har mahine ki payments ko booking ke record se milata hai.

    - “matched the demo month perfectly” = demo wale mahine ko bilkul theek mila diya.
    - “last year’s reconciliations, which the rink already trusts” = pichle saal ka mila-hua hisaab jis par rink pehle se bharosa karta hai.
- *Mushkil lafz:* reconciliation = do records ka milan. slip through = nazar bacha kar nikal jana. flagged = nishan zad.
- *Question line:* “Which TWO steps… before relying on it” = isse istemal karne se pehle kaun se DO qadam?
- Exam trap: “Demo perfect tha” (A) aur “sirf failures dekho” (C). Dono chhupi hui ghaltiyan chhor dete hain.

Summary table

Q	Chapter section tested	Type
1	Three modes: Agency (future, for others)	Single
2	Delegation: problem awareness (Mistake 1)	Single
3	Process description: split by order, check each step	Single
4	Discernment: a claimed action that never happened	Single
5	Grounding prompt: use only supplied documents, quote the source	Select two
6	Feedback pattern: Problem, Why it matters, Direction	Single
7	Review endings: human override	Single
8	Process discernment: net-loss check	Single
9	Creation diligence: redaction fails both ways	Single
10	Numbers rule: compute, never generate	Single
11	Deployment diligence: check depth by reach and irreversibility	Select two
12	Performance discernment: serving people when unwatched	Single
13	Bookkeeping example: trusted history and apparent successes	Select two

Questions to verify yourself

- Q8: The chapter says three moves “escalate” (change the performance description, change the tool, take the task back). It does not state the order outright. I read it as the listed order, with the format rule first. Also check the 25-versus-20-minute logic against the chapter’s “20 saves 15 is a loss” line.
- Q7: The chapter lists “needs human override” only as a review-checklist label. It does not describe a revenue-manager case, so applying it to unverified, high-stakes policy figures is my extension of the rule.

- Q12: The chapter's tutor example is brief, and the fix (a rule in the performance description) is my reading of "performance description for deployed agents". The chapter does not say "add a rule" for this exact case.
- Q1: "Hardest of the three" comes from the chapter saying agency is "what makes Mode 2 hard" because you cannot supervise every decision.

3 rules for recognising any exam question

Rule 1: Read the last line first and name the question type.

- "Next step?" means one smallest sufficient action.
- "Which pattern and what fix?" means diagnosis and fix must both match.
- "Which TWO?" means exactly two options are right, and each must be right alone.

Rule 2: Find the deciding details in the scenario. Underline these five:

- Stakes (how much money or harm).
- Can it be undone?
- Who checks, and when?
- What already exists?
- Who reads the output, and is she watching?

Ignore the harmless extras (the "new tool", "repeat customers", "two-day turnaround").

Rule 3: Name each wrong option's trap, then pick the smallest fix that matches the chapter rule. These are the common traps in this set:

- A fix bigger than the problem (bara model, restart, rewrite).
- Right action, wrong time (check after release).
- A check too weak or by the wrong person (AI checks itself, or asking "are you sure?").
- Treating the symptom (an extra instruction or a longer prompt).
- Half right, half wrong (checking only the total).
- A polished or confident answer taken as proof of correctness.

If two options both look right, ask which one matches the deciding detail from Rule 2. The other one will fail on stakes, timing or who checks.
